# Preface to the Fifth Edition

*Understanding and Using English Grammar* is a developmental skills text for intermediate to advanced English language learners. It functions principally as a classroom teaching text but also serves as a comprehensive reference text for students and teachers.

*Understanding and Using English Grammar* takes a time-tested approach that blends direct grammar instruction with carefully sequenced practice to develop all language skills. Grammar is viewed as an organizing system to help students make sense of the language they see and hear, rather than as a mere collection of rules. This perspective provides a natural, logical framework for students to make English their own.

This edition has been extensively revised to keep pace with advances in theory and practice. Every aspect of the previous edition was reviewed, including the charts, exercises, and sequencing of grammar points. We are excited to introduce significant new features and updates:

- **New as well as updated grammar charts based on corpus research** reflect current usage and highlight the differences between written and spoken English in informal and formal contexts.
- **Pretests at the start of chapters** let learners check what they already know and orient themselves to the chapter content.
- **A wide range of thematic exercises** provides opportunities for contextualized language use.
- **A variety of new readings** covers current topics, strategies for student success, study skills, and other academic and practical content.
- **More meaning-based and step-by-step practice** helps learners better grasp concepts underlying the target grammar.
- **Article use (*a, the, an*)** is now the focus of an entire chapter.
- **New guided writing activities** are supported by writing tips and editing tasks.
- **Self-study practice for gerunds and infinitives** has been added, beginning with Chapter 1, so that students can learn at their own pace.
- **A fresh design** includes a generous use of photos to add interest and serve as the basis for fluency practice.
- **A large increase in the number of exercises** supports teachers who would prefer not to supplement.
- **Three topics, absent in the Fourth Edition, are back in the Fifth Edition:** *The Subjunctive in Noun Clauses, Past Forms of Infinitives and Gerunds, and Using a Possessive to Modify a Gerund.*

Now more than ever, teachers will find that they can select from an extensive repertoire of presentations, activities, and tasks depending on the specific needs of their classes. To accommodate all of the new material, some Fourth Edition content has been moved to MyEnglishLab.

Components of *Understanding and Using English Grammar*, Fifth Edition:

- **Student Book with Essential Online Resources** includes the access code for audio, video, expanded practice of gerunds and infinitives, self-assessments, and teacher resources with the Student Book answer key.
- **Student Book with MyEnglishLab** includes the access code to MyEnglishLab, an easy-to-use online learning management system that delivers rich online practice to engage and motivate students.
- A comprehensive **Workbook** consists of self-study exercises for independent work.
- A **Teacher's Guide** features step-by-step teaching suggestions for each chart and notes on key grammar structures, vocabulary lists, and expansion activities.
- A revised **Test Bank** with quizzes, chapter tests, and mid-term and final exams.
- A **Chartbook**, a reference book that consists of only the grammar charts.
- *AzarGrammar.com*, a website that provides a variety of supplementary classroom materials as well as a place where teachers can support each other by sharing their knowledge and experience.

# AN INCREDIBLE FEAT

In 2011, at the age of 100, Fauja Singh did something incredible: he ran a 26-mile (42 km.) marathon! He was the first 100-year-old to ever run a marathon. Singh decided he wanted to compete in races when he saw a marathon race on TV. He was 89! He didn't know much about training and showed up for his first session in a suit and tie.

Originally from India, Singh moved to England in the 1990s after his wife and son died. At the time, he said he felt more dead than alive. He was very depressed and later believed that long-distance running saved him.

He competed in his first marathon in London at the age of 89. He prepared for it in only ten weeks. His best time was at the 2003 Toronto Waterfront Marathon. He ran it in five hours and 40 minutes. Singh became world-famous and even carried the Olympic torch in 2012. In 2013, he decided to retire from long-distance running and completed his last marathon in Hong Kong.

## EXERCISE 38 ▶ Reading and writing. (Chapter 1)

**Part I.** Read the journal entry. Underline the 23 past tense verbs.

Do you know these words?

- somewhat
- embarrassed
- syllabus
- interrupt

### A Hopeful Beginning

Today was my first day at the university, and I was late for class. I didn't remember the name of the building and went to the wrong one. After about ten minutes of confusion, I finally found the right class and walked in somewhat embarrassed. A girl with a friendly smile moved her books off the chair next to her. I sat down. The professor was going over the syllabus. I didn't have a copy, but I didn't want to interrupt him. The girl next to me shared hers. The course looked interesting but difficult. I wondered if all my classes had this much work. Then the teacher announced study groups. My new friend and I were in the same group. She introduced herself during the break, and I felt very comfortable when I spoke with her. Maybe the class is going to be OK after all.

**Part II.** Write a journal entry about your experience in a class on your first day of school.

1. Begin with *It was my first day at the university / in high school / in English class / etc.*
2. What was the teacher doing when you walked in? What were other students doing?
3. Did you notice anyone or anything special?
4. How did you feel?
5. What were your first impressions about the class and what were your thoughts later?

### WRITING TIP

It is important to consider your first piece of writing a draft, not your finished copy. When you begin to write, jot down ideas first and then sentences. As you write your paragraph, you can always change, reorder, or delete ideas. After you finish the paragraph, edit it carefully. Correct any errors in your next draft. Then read it again and make additional changes or rewrite if necessary. You might need to do this a few more times. It may sound like a long process, but your writing will be much better.

**Part III.** Edit your writing. Check for the following:

1.  indented paragraph
2.  use of the simple past for an activity that began and ended at a particular time in the past
3.  use of the past progressive for an activity in progress in the past
4.  correct spelling (use a dictionary or spell-check)

**Fluency Practice.** Work with a partner. Take three minutes to tell your partner about your experience on the first day of school. Then describe your experience to another student in two minutes. Finally, take one minute to describe your experience to a third student. Did the final time you spoke feel more comfortable and easier than the first time?

## SELF-STUDY: Gerunds and Infinitives 1

At the end of Chapters 1–12, short self-study lessons are available so that you can begin to practice them. Chapter 1 appears below; Chapters 2–12 are online in Essential Online Resources. You will see this reminder at the end of these chapters:

**for** + a length of time (e.g., two months, three years)

(e) I *have known* Rob *since* I was in high school.

(f) We *have lived* in an apartment *since* we moved to this city.

A time clause (i.e., a subject and verb) may follow *since*, as in (e) and (f).\* NOTE: The verb before *since* is present perfect. The verb in the time clause is simple past.

## EXERCISE 15 ▶ Reading, grammar, and speaking. (Chart 2-4)

**Part I.** Read the paragraph. Underline the present perfect verbs.

Discuss their use.

### A Bucket List

The phrase "bucket list" has become popular because of a movie of the same name: *The Bucket List*. In the movie, two cancer patients, one a playboy and the other a family man, become roommates in the hospital. Neither has a good prognosis. They spend a lot of time together and talk about what they want to do before they "kick the bucket." *Kick the bucket* is an idiom for "die." So the two friends make "a bucket list": a list of things they want to accomplish before they kick the bucket.

Now many people have made bucket lists. Activities often include traveling to exotic places and doing exciting sports like skydiving or bungee jumping. There are books and websites with hundreds of suggestions.

Think about your life. What haven't you done but would like to do?

Do you know these words?  
- cancer patient  
- prognosis

**Part II.** Work with a partner and take turns summarizing what Monica has already done and what she has not yet done. Use these sentences: *She has ... already.* OR *She hasn't ... yet.*

SITUATION: Monica, an architect, is 65 years old. She has had a bucket list since she was 50. The checkmarks are for the activities she has already done.

1.  ride in a hot-air balloon
2.  learn how to write computer code
3.  eat at a 5-star restaurant
4.  find a job she never wants to quit
5.  sing in front of a live audience
6.  discover a cure for her insomnia
7.  sleep on a beach under the stars
8.  swim with dolphins
9.  travel to Antarctica
10.  have an interesting conversation with a famous person

**Part III.** Make your own bucket list of 5–7 items. Share your list with your classmates. Who has the same wishes as you? Who has already accomplished some of them?

### EXERCISE 16 ▶ Warm-up: listening. (Chart 2-5)

Listen to these common questions. How are *have* and *has* pronounced?

- |                                 |                        |                           |
|---------------------------------|------------------------|---------------------------|
| 1. How have you been?           | 3. What has happened?  | 5. When have I said that? |
| 2. How long have you been here? | 4. What have you done? | 6. Where have you been?   |

## 2-5 Have and Has in Spoken English

(a) **How have** you been?

Spoken: *How/v/* you been? OR  
*How/əv/* you been?

(b) **Jane has** already eaten lunch.

Spoken: *Jane/z/* already eaten lunch. OR  
*Jane/əz/* already eaten lunch.

(c) **Mike has** quit his job.

Spoken: *Mike/s/* quit his job. OR  
*Mike/əs/* quit his job.

In spoken English, the present perfect helping verbs *has* and *have* are often reduced following nouns and question words.\*

In (a): *have* can sound like /v/ or /əv/.

In (b): *has* can sound like /z/ or /əz/.

In (c): *has* can sound like /s/ or /əs/.\*\*

NOTE: “ə” sounds like “uh.”

*Jane/z/* eaten. **Jane’s = Jane has**

*Jane/z/* here. **Jane’s = Jane is**

*Mike/s/* quit his job. **Mike’s = Mike has**

*Mike/s/* here. **Mike’s = Mike is**

\*In very informal writing, *has* is sometimes contracted with nouns (e.g., **Jane’s already eaten.**) and question words (e.g., **Where’s he gone?**). *Have* is rarely contracted in writing except with pronouns (e.g., *I’ve*). See Chart 2-4 for written contractions of *have* and *has* with pronouns. See Appendix Chart C for more information about contractions in general.

\*\*See Appendix Chart E-6 for the pronunciation of final *-s* after voiced and voiceless sounds.

### EXERCISE 17 ▶ Listening. (Chart 2-5)

Complete the sentences with *is*, *has*, or *have*. Write the full forms, not the contractions.

Read the blog entry by author Stacy Hagen. Underline the simple past and present perfect verbs in the paragraphs. Discuss as a class why they are simple past or present perfect.

### BlueBookBlog Using Flashcards with Spaced-Repetition Practice

Have you ever used flashcards to study grammar or vocabulary? Have you made flashcards to study the past participle forms that you saw at the beginning of this chapter? Research has shown that using flashcards with spaced-repetition practice is a very effective way to memorize information.

Spaced repetition means spacing out your practice over a period of time. For example, after you study a list of vocabulary words, you wait a few days to review them. If you get the words correct, you wait longer before you review them again. On the other hand, for words you missed, you practice them over shorter periods of time. There are many apps for spaced-repetition flashcard practice. I personally like AnkiApp because it's very user-friendly. Anki follows your progress and chooses the flashcards for you to study each day.

Why is memorizing this way effective? Think about learning basic math. If you know your times tables (e.g., 5x1, 5x2, 5x3), then your mind is free to do more complex math because you don't have to figure out these basic equations. The answer is right there for you to use. We can think of grammar in a similar way. If you know your past participles automatically, you don't need to think about the form before you try to express your ideas.

For English grammar, I think spaced repetition is especially useful for learning irregular past tense and past participle forms; gerunds and infinitives; prepositions; and two- and three-word verbs. You can try out this technique with the past participles that we have studied in this chapter or with the gerunds and infinitives at the end of Chapter 1. See what you think. You may be pleasantly surprised by your progress. Good luck!

## EXERCISE 22 ▶ Let's talk. (Charts 2-1 → 2-6)

Work in groups of 5-7 students. Ask questions with the given words and **Who has**. When someone answers "yes," ask *wh*-questions to get more information. NOTE: The follow-up questions will use past tense.

**Example:** catch a big fish

STUDENT A: Who has caught a big fish?

STUDENT B: I have.

STUDENT C: What did you catch?

STUDENT D: Where did you catch it? etc.

1. write a blog?
2. lose a credit card?
3. climb to the top of a mountain?
4. give a speech to a large audience?
5. tell a lie?
6. sing in public?
7. ride on a motorcycle?
8. feed a lion?
9. drink Turkish coffee?
10. take a cooking class?
11. shake hands with someone famous?
12. hold a snake?
13. fall on ice?
14. accidentally shrink a shirt?

### EXERCISE 23 ▶ Editing. (Chart 2-6)

Help Carolina send an effective job inquiry. Read her letter and correct the 8 errors she makes with past tense and present perfect verbs.

414 3rd Ave.  
New York, NY 10026

Dear Mr. Anderson:

I have just learned from my friend Robert Shaw that he has deciding to leave his position as tour guide and that you need to find a summer replacement quickly. I would like to apply for the position.

I have come to this city two years ago to study at Columbia University. I am a student in history and economics since that time. I am a hard worker and have held several part-time jobs at the college: tutor, library researcher, and History Department teaching assistant.

I am originally from Mexico City and speak fluent Spanish and English. My father is an English professor, and I have learned to speak English as a child. When I lived in Mexico, I have worked at my uncle's hotel. I help tourists with their travel arrangements in the city. I also give city tours in both Spanish and English. I have a good sense of humor, and my tours were a lot of fun.

Because of my history background, I am very interested in this city since I arrived. I have done a lot of reading and have discovered many fascinating stories about it.

I think I have the qualifications to make an excellent tour guide. Would it be possible to speak with you about the job at a convenient time? I thank you in advance.

Sincerely,  
*Carolina Burns*

### EXERCISE 24 ▶ Warm-up. (Chart 2-7)

Check (✓) the two correct sentences in each group.

- Anita is at the bus stop.
  - \_\_\_\_\_ She is waiting for the bus.
  - \_\_\_\_\_ She is waiting for the bus for 15 minutes.
  - \_\_\_\_\_ She has been waiting for the bus for 15 minutes.
- Tarik is at the bus stop too.
  - \_\_\_\_\_ He is standing beside Anita.
  - \_\_\_\_\_ He is standing there since five o'clock.
  - \_\_\_\_\_ He has been standing there since five o'clock.

## 2-7 Present Perfect Progressive

- (a) Right now I **am sitting** at my desk.
- (b) I **have been sitting** at my desk **since** seven o'clock. I **have been sitting** here **for** two hours.
- (c) It's **been raining all day**. It's still raining right now.

COMPARE:

In (a): The PRESENT PROGRESSIVE expresses *an activity in progress right now*. (See Chart 1-1, p. 2.)

In (b): The PRESENT PERFECT PROGRESSIVE expresses *how long* an activity has been in progress. In other words, it expresses *the duration of an activity that began in the past and continues in the present*.

Time expressions often used with this tense are

- *since* and *for*, as in (b);
- *all day/all morning/all week*, as in

NOTE: In (c): **It's been raining. It's = It has**  
**It's still raining. It's = It is**

- (d) I've **known** Alex **since** he was a child.

INCORRECT: ~~I've been knowing~~ Alex since he was a child.

The present perfect progressive is not used with non-progressive or stative verbs such as *know*. To express *the duration of a situation that began in the past and continues to the present*, only the present perfect is used.

(See Chart 1-3, p. 7, for a list of non-progressive verbs.)

- (e) How long **have** you **been living** here?
- (f) How long **have** you **lived** here?
- (g) Ben **has been wearing** glasses since he was ten.
- (h) Ben **has worn** glasses since he was ten.

For some (not all) verbs, the idea of *how long* can be expressed by either tense — the present perfect progressive or the present perfect.

NOTE: (e) and (f) have the same meaning;  
(g) and (h) have the same meaning.

Either tense can be used only when the verb expresses the duration of present activities or situations that happen regularly, usually, habitually: e.g., *live, work, teach, study, wear glasses, play chess, etc.*

- (i) I've **been thinking** about looking for a different job. This one doesn't pay enough.
- (j) All of the students **have been studying** hard. Final exams start next week.

When the tense is used without any mention of time, it expresses a general activity in progress recently, lately. For example, (i) means *I've been thinking about this recently, lately*.

### EXERCISE 30 ▶ Reading and writing. (Chart 2-7)

**Part I.** Product reviews on websites often use the present perfect and present perfect progressive. Look at the following examples and underline the present perfect and present perfect progressive verbs. Discuss their use.

1. ★★★★★☆ **Very Nice Camera!**

By Sammy P.

I have had this camera for 8 months now. It takes great pictures. I haven't had any problems with it. It's a little complicated to learn at first, but the instructions help. I have ordered other products from this site and have had great service.

2. ★★★★★★ **Incredible Product**

By Vitafan

I have been taking these vitamins since last year. They're incredible! My memory has improved. I have had more concentration and have been doing better in school. I have lost weight and I haven't even been trying! This product is fantastic!

3. ☆☆☆☆☆ **DO NOT BUY**

By Adriana J.

I don't know why this company is in business. I have never been so disappointed with a product in my life. My laptop arrived with a dead battery. The customer service is terrible. I have emailed and called the company numerous times, but they haven't responded. I have asked for a refund and now am waiting for a response. Order from this company only if you want a defective product.

**Part II.** Find an online product review that uses present perfect and/or present perfect progressive. Underline the verbs in the perfect tenses.

**Part III.** Write a short product review for an item you own. Use the present perfect and present perfect progressive at least one time each.

\*Notice: A statement form (not a question form) can sometimes be used to ask a question by using a rising intonation at the end of a sentence.

## EXERCISE 31 ▶ Warm-up. (Chart 2-8)

Look at the verbs in blue. Which event happened first?

1. The teacher **stood up**. Someone **had knocked** on the classroom door.
2. I **looked** at the board. The teacher **had written** my name there.

### 2-8 Past Perfect

- (a) Sam came at 10:00.  
Ann left at 9:30.  
In other words, Ann **had** already **left** when Sam came.

The PAST PERFECT expresses an activity that was complete before another activity or time in the past.

- (b) *By the time* Sam came, Ann **had** already **left**.

In (a): 1st: Ann left.  
2nd: Sam came.

Adverb clauses with *by the time* are frequently used with the past perfect in the main clause, as in (b).\*

- (c) Sam **had left** *before* Ann came.  
(d) Sam **left** *before* Ann came.  
(e) *After* the guests **had left**, I went to bed.  
(f) *After* the guests **left**, I went to bed.

If either *before* or *after* is used in the sentence, the past perfect is often not necessary because the time relationship is already clear. The simple past may be used, as in (d) and (f).

NOTE: (c) and (d) have the same meaning;  
(e) and (f) have the same meaning.

- (g) *Actual spoken words*: I **lost** my keys.  
(h) *Reported words*: Jenny **said that she had lost** her keys.

The past perfect is commonly used in reported speech.\*\* If the actual spoken words use the simple past, the past perfect is often used in reporting those words, as in (h).

Common reporting verbs include *tell (someone)*, *say*, *find out*, *learn*, and *discover*.

- (i) *Written*: Bill **felt** great that evening. Earlier in the day, Annie **had caught** one fish, and he **had caught** three. They **had had** a delicious picnic near the lake and then **had gone** swimming again. It **had been** a nearly perfect vacation day.

The past perfect is often found in more formal writing such as fiction.

In (i), the fiction writer uses the simple past to say that an event happened (*Bill felt great*), and then uses the past perfect to explain what had happened before that event.

- (j) *I'd* left. *You'd* left.  
*We'd* left. *They'd* left.  
*She'd* left. *He'd* left.  
*It'd* left.

**Had** is often contracted with personal pronouns in informal writing.

NOTE: *I'd* left. *I'd* = *I had*  
*I'd* like to leave. *I'd* = *I would*

\*For more information about *by the time*, see Chart 17-2, p. 373.

\*\*For more information about verb form usage in reported speech, see Chart 12-7, p. 262.

## EXERCISE 45 ▶ Reading and writing. (Chapter 2)

**Part I.** How has the world changed since the 1950s? Read the passage. Why does the first paragraph have mostly simple past and the second paragraph have more present perfect?

### A Different World

My parents were born in the 1950s.\* Since then, the world has gone through extraordinary changes, especially in the areas of communication and electronics. My parents didn't have devices like computers and cell phones. There was no Internet until the 1990s. Students went to the library to do research, and it took them many hours to find information. They typed their papers on typewriters, and when they made a mistake, they began again. They often wrote letters because long-distance phone calls were expensive. They didn't have voicemail, so they had to call people back. Some homes still had party lines: families shared one phone line, and sometimes people picked up the phone and heard their neighbors' conversations. For entertainment, they had just a few channels on the TV, or they watched movies in theaters. They played music on phonographs or listened to the radio.

Since the 1980s, computers and the Internet have changed communication dramatically. People get information instantly online, and they can reach each other quickly through email. Cell phones have been available since the 1990s. Texting has become so popular that for many people it has replaced phone calls. Computers and cell phones have also introduced people to apps for games, social media, music, movie streaming, and photo editing, to name just a few. The world seemed very quiet in my parents' time, but for better or for worse, life today has become digital.

Do you know these words?  
- extraordinary  
- dramatically

\*Note that there is no apostrophe when adding -s to years.

**Part II.** Think about the decade when your parents' generation was born. What was different about life in that decade? Here are some areas you can think about to get started: communication, culture, fashion, advertising, entertainment, inventions, transportation, and the environment.

1. Choose one topic and make a list of changes.
2. Write one or two paragraphs based on your list.
3. Think carefully about the use of the simple past and present perfect as you write.

### WRITING TIP

If you want your writing to sound more natural, it is important to not translate from your language. There is a good chance that your language expresses ideas very differently. In the beginning, use simple sentence structures that you have learned. You may want to express a complex idea, but if you haven't learned the grammar for this, break the idea down into simpler language. As you learn more advanced grammar, you can begin to express more complex ideas.

Reading English books and listening to English are also very important for good writing. You start to see that particular words go with other words in a specific way. And certain words, phrases, and structures begin to sound familiar as well. At this point, you may find that they start to appear in your writing in a natural way.

**Part III.** Edit your writing. Check for the following:

1.  indented paragraph(s)
2.  use of the simple past for activities that began and ended at a particular time in the past
3.  use of the present perfect for activities that began in the past and are still in progress, or for unspecified or recent time
4.  correct spelling (use a dictionary or spell-check)

1. Which sentence expresses a prior plan? \_\_\_\_\_
2. Which sentences are predictions? \_\_\_\_\_ and \_\_\_\_\_
3. Which sentence expresses an offer to help? \_\_\_\_\_

## 3-2 Will vs. Be Going To

### Prediction

- (a) According to the weather report, it *will be* cloudy tomorrow.
- (b) According to the weather report, it *is going to be* cloudy tomorrow.

**Will** and **be going to** mean the same when they make *predictions* about the future (*prediction* = a statement about something the speaker thinks will be true or will occur in the future).

Examples (a) and (b) have the same meaning.

### Prior Plan

- (c) — Why did you buy this paint?  
— I'm *going to paint* my bedroom tomorrow.
- (d) — Are you busy this evening?  
— Well, I really don't have any plans. I'll *eat*/I'm *going to eat* dinner, of course. And then I'll probably *watch*/I'm probably *going to watch* TV for a little while.
- (e) The meeting *will begin* at 10:00 A.M. We *will have* two hours for discussion.

**Be going to** is commonly used in speaking to express a *prior plan* (i.e., a plan made before the moment of speaking).

In (c): The speaker already has a plan to paint his bedroom. He could also say, "I'm planning to paint my bedroom."

NOTE: In (d), either **will** or **be going to** is possible. The second speaker has not planned her evening. She is "predicting" her evening (rather than stating any prior plans), so she may use either **will** or **be going to**.

In writing, **will** is more common.

### Willingness

- (f) — The phone's ringing.  
— I'll *get* it.
- (g) — How old is Aunt Agnes?  
— I don't know. She *won't tell* me.
- (h) The car *won't start*. Maybe the battery is dead.

**Will** (but not **be going to**) is used to express *willingness* or *offer to help*. In this case, **will** expresses a decision the speaker makes at the moment of speaking.

In (f): The second speaker decides to answer the phone at the immediate present moment; she/he does not have a prior plan.

**Will not / won't** can express *refusal*, as in (g) with a person or in (h) with an inanimate object.

## EXERCISE 6 ▶ Grammar, speaking, and listening. (Chart 3-2)

**Part I.** Work with a partner. Read each conversation aloud. Discuss the *italicized* verbs. Are the speakers expressing:

B: Oh, sorry. It sounds like a lot of fun, but I'm *going to be* at my cousin's wedding.

## 3-4 Using the Present Progressive and the Simple Present to Express Future Time

### Present Progressive

- (a) My wife has an appointment with a doctor. She *is seeing* Dr. North *next Tuesday*.
- (b) Sam has already made his plans. He *is leaving* *at noon tomorrow*.
- (c) — What are you going to do this afternoon?  
— *After lunch, I am meeting* a friend of mine. We *are going* to the mall. Would you like to come along?

The PRESENT PROGRESSIVE may be used to *express future time when the idea of the sentence concerns a planned event or definite intention*.

COMPARE: A verb such as *rain* is not used in the present progressive to indicate future time because rain is not a planned event.

A future meaning for the present progressive tense is indicated either by future time words in the sentence or by the context.

### Simple Present

- (d) The museum *opens* *at 10:00 tomorrow morning*.
- (e) Classes *begin* *next week*.
- (f) John's plane *arrives* *at 6:05 P.M. next Monday*.

The SIMPLE PRESENT can also be used to *express future time in a sentence concerning events that are on a definite schedule or timetable*. These sentences usually contain future time words. Only a few verbs are used in this way: e.g., *open, close, begin, end, start, finish, arrive, leave, come, return*.

### EXERCISE 18 ▶ Looking at grammar. (Chart 3-4)

Decide the meaning of each *italicized* verb: *in the future*, *now*, or *habitually*.

1. A: Students usually *take* four courses each semester.

habitually

Why *are you only taking* three?

now

- B: I have a very demanding internship. But next semester, I *am taking* five courses to make up.

in the future

2. A: What *are you doing*?

- B: I'm *sending* an email to my parents. It's their anniversary. But they're probably out to dinner. That's how they *celebrate* every year.

3. A: What? Our train *leaves* in five minutes?

- B: Yes, it *leaves* every hour on the hour.

4. A: My brother's birthday is next week. I'm *giving* him a sweater.

- B: That's what I usually *give* my brother. Sweaters make a good gift.

### EXERCISE 19 ▶ Looking at grammar. (Chart 3-4)

#### My Vacation of a Lifetime

This coming Saturday, I am beginning my "vacation of a lifetime." The first place I'm going to is Bali. My plane leaves at six-thirty Saturday morning. I arrive in Bali late that afternoon. I'm staying at the Nusa Dua Beach Hotel. I leave Bali on the fifteenth and travel to Thailand. While I'm there, I'm staying with some friends. We'll take a boat tour in Bangkok and then travel to the countryside. There is a national park, and we'll do some hiking. Finally we'll finish in Phuket. It'll be nice to relax on the beaches and go windsurfing too. This will be my first trip to these places.

The progressive form of *be going to*: **be going to + be + -ing**, as in (b)

(c) I'll **be picking** Susie up early for a dentist appointment.

**Will** + the progressive can be used with an activity that is not in progress at a time in the future. It is common in spoken English when the speaker wants to sound more polite or softer. It is an alternative to:

(d) We'll **be contacting** you shortly about your inquiry.

1) the non-progressive form of **will**

#### WRITING TIPS

Many students are unsure about how formal or informal an email message to an instructor needs to be. A formal style will come across as more respectful. This means that your message will be more like a business letter and not like a text message or a post on social media. Here are some key points to consider:

- Formal messages do not use texting language, for example, “u” for “you” or “thanx” for “thanks.” They do not have smiley faces or other emoticons. Do not even use this: :)
- The subject line needs to be specific.
- At the college level, you can begin your message with *Dear Professor \_\_\_\_\_* or *Dear Dr. \_\_\_\_\_*. If you don't know the title, then you can use *Mr.* or *Ms.* For K–12\*, the title will generally be *Mr.*, *Mrs.*, or *Ms.*
- It is better to get class information/assignments online or from a classmate than by contacting the instructor. Only ask the instructor if there are no other options.
- Be sure you have an acceptable reason for your request or excuse. If you don't, don't mention a poor one.
- Sign your first and last name, and begin with one of the following: *Thank you*, *Sincerely*, *Regards*, *Best*, *Respectfully*.
- Double-check that you have the correct email address. If one letter is wrong, your email will not get to the intended person.
- Keep your message concise and to the point.

Finally, instructors receive a lot of emails in one day. Be sure to proofread for grammar and spelling mistakes. You want your message to be easy to read and you want to convey that you are a conscientious student.

These guidelines will also be useful for writing to other school officials or to people outside of school, such as employers, supervisors, and co-workers. You will probably find that some instructors have a more relaxed style, but until you hear from them, you won't go wrong with a formal style.

\*K–12 = kindergarten through 12th grade

**Part II.** Write two emails to a teacher. In the first, explain why you will be absent for three days. In the second, explain why you will miss an upcoming test. (They do not need to be true.) Share and discuss with one or two classmates.

**Part III.** Edit your writing. Check for the following:

1.  specific subject line
2.  appropriate form of address and proper signature
3.  complete sentences
4.  formal tone
5.  no texting language or emoticons
6.  correct spelling (use a dictionary or spell-check)

### The Pomodoro Technique

One of the biggest challenges that students face is how to deal with procrastination. Even if you haven't heard of this word, you're probably familiar with it. Procrastination is putting off or delaying something you need to do. Maybe you need to study for a test, but you find lots of other things to do instead. Or perhaps you have a paper due, and you wait until the last minute to begin. With Internet and social media distractions, it's even harder to complete tasks, whether at school, home, or work.

A while ago, I came across a time-management technique I have found very helpful for dealing with my own tendency to procrastinate. It's called the Pomodoro technique. In Italian, *pomodoro* means "tomato." The Italian developer of this idea, Francisco Cirillo, had a food timer in the shape of a tomato, so he named his idea after it.

It's a very simple idea. You take a timer and set it for 25 minutes. Then you work uninterrupted until the timer goes off. Because it's only 25 minutes, it doesn't feel overwhelming. Instead of thinking about all the work you need to do to prepare for a test, for example, (which can seem daunting), you just do a piece of it for 25 minutes.

After the timer goes off, you reward yourself for five minutes. Maybe you look at social media or get a snack. When the five minutes is up, you set the timer again. After you do this four times, you can give yourself a longer reward: a break for maybe 15–30 minutes.

This technique has helped me a lot with procrastination. I have found that it makes tasks at home and work much more doable because you just need to think about 25 minutes of work at a time.

How about you? Do you have problems with procrastination? Have you found helpful techniques? Do you think the Pomodoro technique is something that you want to try?

## 5-1 Final -s/-es: Use and Spelling

### Use

(a) **Noun + -s:** *Friends* are important.  
**Noun + -es:** I like my *classes*.

A final **-s** or **-es** is added to a noun to make the noun plural.  
**Friend** and **class** = singular nouns  
**Friends** and **classes** = plural nouns

(b) **Verb + -s:** Mary *works* at the bank.  
**Verb + -es:** John *watches* birds.

A final **-s** or **-es** is added to a simple present verb when the subject is a singular noun (e.g., *Mary, my father, the machine*) or third person singular pronoun (*she, he, it*).  
**Mary works** = singular      **She works** = singular  
**The students work** = plural      **They work** = plural

### Spelling

(c) sing → *sings*  
 song → *songs*

For most words (whether a verb or a noun), simply add a final **-s** to spell the word correctly.

(d) wash → *washes*  
 watch → *watches*  
 class → *classes*  
 buzz → *buzzes*  
 box → *boxes*

Final **-es** is added to words that end in **-sh, -ch, -s, -z, and -x**.  
 NOTE: The pronunciation is /əz/ ("uz").

(e) toy → *toys*  
 buy → *buys*  
 (f) baby → *babies*  
 cry → *cries*

For words that end in **-y**:  
 In (e): If **-y** is preceded by a vowel, only **-s** is added.  
 In (f): If **-y** is preceded by a consonant, the **-y** is changed to **-i** and **-es** is added.

### EXERCISE 2 ▶ Spelling (Chart 5-1)

Add **-s** or **-es**.

- |                   |              |                 |                   |

b. The apples in the bowl **are** fresh.
2. a. Vegetables **are** good for you.  
b. Eating vegetables **is** good for you.

5-2 Basic Subject-Verb Agreement		
Singular Verb	Plural Verb	
(a) My <i>friend lives</i> in Boston.	(b) My <i>friends live</i> in Boston.	<i>verb + -s/-es</i> = third person singular in the simple present tense <i>noun + -s/-es</i> = plural
	(c) My <i>brother and sister live</i> in Boston. (d) My <i>brother, sister, and cousin live</i> in Boston.	Two or more subjects connected by <b>and</b> require a plural verb.
(e) <i>Every man, woman, and child needs</i> love. (f) <i>Everyone is</i> here. (g) <i>Everybody is</i> here. (h) <i>Each book and magazine is</i> listed in the bibliography.		EXCEPTION: Expressions with <b>every</b> and <b>each</b> are always followed immediately by singular nouns. (See Chart 6-10, p. 115.) Even when there are two (or more) nouns connected by <b>and</b> , the verb is singular, as in (h).
(i) That <i>book on political parties is</i> interesting. (k) The <i>book that I got from my parents was</i> very interesting.	(j) The <i>ideas in that book are</i> interesting. (l) The <i>books I bought at the bookstore were</i> expensive.	Sometimes a phrase or clause separates a subject from its verb. These interrupting structures do not affect basic agreement. For example, in (i) the interrupting prepositional phrase <b>on political parties</b> does not change the fact that the verb <b>is</b> must agree with the subject <b>book</b> . In (k) and (l): The subject and verb are separated by an adjective clause. (See Chapter 13.)
(m) <i>Watching old movies is</i> fun.		A gerund (e.g., <i>watching</i> ) used as the subject of the sentence requires a singular verb. (See Chart 14-1, p. 303.)

\**News* takes a singular verb. (For more information, see Chart 5-6.)

### 5-3 Collective Nouns

<p>(a) The <u>audience</u> is clapping loudly.          (b) The <u>team</u> practices at noon          (c) The <u>faculty</u> has chosen a new president.          (d) The <u>staff</u> has been working overtime.</p>	<p>Collective nouns, as in (a)–(d), refer to more than one person. In American English, singular verbs are preferred with collective nouns.*          NOTE: British English prefers the plural verb: <i>The faculty have chosen a new president.</i> OR <i>The staff have been working overtime.</i></p>															
<p>(e) The <u>faculty</u> are preparing for classes.          (f) The <u>staff</u> have requested raises.          (g) The <u>staff members</u> have requested raises.          (h) <u>Members of the staff</u> have requested raises.</p>	<p>A plural verb can be used to emphasize the individual members. Note the meaning:          (e) = individual faculty members          (f) = individual staff members          Many speakers rephrase the idea with the word <i>members</i>, as in (g) and (h), if they want to emphasize the individual members of the group.</p>															
<p><b>Common collective nouns</b></p> <table border="0"> <tr> <td>audience</td> <td>committee</td> <td>faculty</td> <td>group</td> <td>staff</td> </tr> <tr> <td>choir</td> <td>crew</td> <td>family</td> <td>jury</td> <td>team</td> </tr> <tr> <td>class</td> <td>crowd</td> <td>government</td> <td>public</td> <td></td> </tr> </table>		audience	committee	faculty	group	staff	choir	crew	family	jury	team	class	crowd	government	public

(r) <i>The number of students in the class is</i> fifteen.	(s) <i>A number of students are</i> late or absent today.	COMPARE: In (r): <i>The number</i> is the subject. In (s): <i>A number of</i> is an expression of quantity meaning "a lot of." It is followed by a plural noun and a plural verb.

In (a): The subject is <i>a fly</i>. (singular)                      In (b): The subject is <i>three windows</i>. (plural)</p>
(c) <b>INFORMAL:</b> <i>There's two sides</i> to every story.	<p>In informal spoken English, some native speakers use a singular verb even when the subject is plural, as in (c). The use of this form is fairly frequent but is not generally considered to be grammatically correct.</p>

\*Sometimes the expression of place is omitted when the meaning is clear. For example, *There are seven continents*. The implied expression of place is clearly *in the world*.

## EXERCISE 18 ▶ Grammar and listening. (Charts 5-1 → 5-5)

Underline the words that determine agreement with the verbs. Then choose the correct verb. Listen to the passage and check your answers.

### What's the difference?

#### 1. Rain vs. Showers

Many people treats<sub>1</sub> / treat these words as having the same meaning. For people who follow the weather, however, there is / are<sub>2</sub> a difference. Rain is steady and covers / cover<sub>3</sub> a larger area. Showers tends / tend<sub>4</sub> to be more scattered and does not last / do not last<sub>5</sub> as long. There is / are<sub>6</sub> an easy way to remember the difference: think about taking a bath vs. taking a shower. Most of us gets / get<sub>7</sub> wetter when we take a bath than when we stands / stand<sub>8</sub> in the shower.

Now, which expression do you think is / are<sub>9</sub> correct: *It's raining out* or *It's showering out*? If you chose the first one, you are right. We use only *rain*, not *shower*, as a verb to talk about the weather.

#### 2. Thief vs. Robber vs. Burglar

Another set of words with distinct differences is / are<sub>1</sub> *thief*, *robber*, and *burglar*. A thief takes / take<sub>2</sub> physical property like TVs, computers, or money, but there is no violence or force. Robbers also takes / take<sub>3</sub> property, but the robber uses / use<sub>4</sub> force or the threat of force, as with a gun. A burglar illegally enters / enter<sub>5</sub> a structure with the intent to commit a crime.

If some of this seems / seem<sub>6</sub> confusing, you are in good company. Many native speakers of English has / have<sub>7</sub> never learned these subtleties and doesn't make / don't make<sub>8</sub> distinctions among these words.

## EXERCISE 19 ▶ Warm-up. (Chart 5-6)

Look at the subjects and verbs (in blue) in each pair of sentences. Some of them are “exceptions to the rule.” For example, nouns that end in *-s* usually take a plural verb, but sometimes not. Look for these irregularities.

  - The United Nations is an international organization.
- Kilometers are measures of distance.
  - Seven kilometers is too far for me to run.
- English is a language.
  - The English are concerned about global warming.
- Mix and fix are verbs.
  - Six and six is twelve.
- Whales are mammals.
  - People are mammals.

(d) <i>Harrods is</i> a department store.	Sometimes a proper noun that ends in <b>-s</b> is singular. In the examples, if the noun is changed to a pronoun, the singular pronoun <b>it</b> is used (not the plural pronoun <b>they</b> ) because the noun is singular. In (a): <b>The United States = it</b> (not <b>They</b> )
(e) <i>The news is</i> interesting.	<b>News</b> is a noncount noun and takes a singular verb.
(f) <i>Mathematics is</i> easy for her. <i>Physics is</i> easy for her too.	Fields of study that end in <b>-ics</b> require singular verbs.

(h) <i>Eight hours</i> of sleep <i>is</i> enough. (i) <i>Ten dollars is</i> too much to pay. (j) <i>Five thousand miles is</i> too far to travel.	Expressions of time, money, and distance usually require a singular verb.

### Plural Verb

(m) <i>Those people are</i> from Canada. (n) <i>The police have</i> been called. (o) <i>Cattle are</i> domestic animals. (p) <i>Fish live</i> under water.	<i>People,* police, cattle, and fish</i> do not end in <b>-s</b> , but they are plural nouns in the example sentences and require plural verbs.
---	---

Singular Verb	Plural Verb	
(q) <i>English is</i> spoken in many countries. (s) <i>Chinese is</i> his native language.	(r) <i>The English drink</i> tea. (t) <i>The Chinese have</i> an interesting history.	In (q): <b>English</b> = language In (r): <b>The English</b> = people from England Some nouns of nationality that end in <b>-sh</b> , <b>-ese</b> , and <b>-ch</b> can mean either language or people, e.g., <i>English, Spanish, Chinese, Japanese, Vietnamese, Portuguese, French.</i>
	(u) <i>The poor have</i> many problems. (v) <i>The rich get</i> richer.	A few adjectives can be preceded by <b>the</b> and used as a plural noun (without final <b>-s</b> ) to refer to people who have that quality. Do you know these words?  
- common practice  
- considerably - rely on  
- mandatory - wages  
- varies - informed

### Tipping

Tipping **is** a common practice throughout the world although the custom can differ considerably among countries. Visitors new to a country **are** often unsure about how much to tip in restaurants, hotels, and airports. Technology **has made** the practice easier. There **are** apps that tell how much to tip in each country for various services.

In the United States and Canada, workers in service industries such as restaurants, airports, and taxi driving commonly **receive** tips. In general, customers tip more when they are happy with the service and less when they are not. The amounts generally **range** from 10–20% of the bill, and the tip is based on the pre-tax amount, not the total bill.

In restaurants, 15% **is** average. Many restaurants now **include** suggested amounts at the bottom of the receipt. Some restaurants have a mandatory service charge if there is a large group (typically six or more people). It's important to ask about this charge because it is usually 15–20%. Some carry-out or take-out restaurants and coffee shops **have** tip jars that some customers use.

Skycaps at airports and bellhops at hotels also **expect** tips. Generally the number of bags the traveler has **determines** the **tip**. The amount per bag **varies**, so it's good to check online before you travel. Tips for a taxi driver **are** usually based on a percentage of the fare, and 10–20% is common.

There **are** other service employees that rely on tip income: housekeeping, valet and concierge staff at hotels; food delivery drivers; hairdressers; and tour guides, to name a few. Many employers base their employees' pay on the belief that most customers will leave tips, and they set the pay lower for that reason. Employees **see** tipping as part of their wages, not as an extra.

Before you visit a country, it's a good idea to research tipping practices so you can make informed decisions about tipping.

**Part II.** Work with a partner or in a small group. Answer these questions.

1. What are your general thoughts on the practice of tipping?
2. Do people in your country leave tips? If so, for what kinds of services? What is the customary amount for these various services?
3. How do you handle tipping?
4. Is it right for employers to pay workers less because they expect their employees to earn tips?

**Part III.** Using the information from your discussion in Part II, write about tipping practices in your country or write about your opinion of tipping. Pay special attention to subject-verb agreement.

## WRITING TIP

These expressions will help you express your opinion:

- In my opinion/view, X is ...
- X is a good/bad idea because ...
- I strongly believe that ...
- I believe in X because ...
- I am/am not in favor of X because ...
- In my experience, X is ...

**Part IV.** Edit your writing. Check for the following:

1.  singular verbs with singular nouns
2.  plural verbs with plural nouns
3.  singular verbs with percentages
4.  singular verbs with **each** and **every**

### **EXERCISE 52 ▶ Grammar, reading, and writing. (Chapter 6)**

**Part I.** Read the following passage.

#### **Web Design**

Websites come in all shapes and sizes. Some are easier to use than others, and some are more attractive than others. Some of this is due to personal preference. Everyone has favorite colors or designs. But there are features that seem to make a website easier to navigate or more visually appealing to us.

For many designers, Apple Inc. is an example of a company with an effective website. The homepage is clean and uncluttered. There isn't much information on the page. It has large photos of its products rather than small ones. It is user-friendly. The links are easy to see and fast. There are many helpful tutorials for products, and they are short. This is important because people want information quickly and don't want to watch long videos. These features have made this company's website attractive and useful.

**Part II.** In your opinion, what features make a good website? Check (✓) the answers.

- |  |  |

| 1. ____ a lot of photos                | 8. ____ links to pages (rather than scrolling) |

- \_\_\_\_ is an example of an effective/helpful/weak, etc. website.
- The opening page is ...
- It is/has ...
- There is/are/isn't/aren't ...

## 7-1 Articles (A, An, The) with Indefinite and Definite Nouns

### Indefinite Nouns

- (a) I had *a banana* for a snack.  
 (b) I had  $\emptyset$  *bananas* for a snack.  
 (c) I had  $\emptyset$  *fruit* for a snack.  
 (d) I had *some bananas* for a snack.  
 (e) I had *some fruit* for a snack.

An indefinite noun is a noun that has not specifically been identified.

In (a): The speaker is not referring to “this banana” or “that banana” or “the banana you gave me.” The speaker is simply saying that she/he ate one banana. The listener does not know or need to know which specific banana was eaten; it was simply one banana out of all bananas.

Because **a\*** means **one**, it is not used with indefinite plural and noncount nouns, as in (b) and (c).

**Some** may be used with indefinite plural count and noncount nouns, as in (d) and (e).

### Definite Nouns

- (f) Thank you for *the banana*.  
 (g) Thank you for *the bananas*.  
 (h) Thank you for *the fruit*.

A noun is definite when both the speaker and the listener are thinking about the same specific noun.

In (f): The speaker uses **the** because the listener knows which specific banana the speaker is talking about, i.e., that particular banana which the listener gave to the speaker.

Note that **the** is used with both singular and plural count nouns, as in (f) and (g), and with noncount nouns, as in (h).

## EXERCISE 32 ▶ Reading and grammar. (Chapter 7 Review)

Part I. Read the passage.

# TOYS IN THE SEA

In 1997, a container ship was traveling from Holland to New York. As it passed the British coastline, a freak wave hit the boat. Sixty-two containers went crashing into the Atlantic Ocean. Inside those containers were LEGO® building bricks, a very popular children's toy. Not just a few went to the bottom of the sea, but millions — 4,756,950 pieces to be exact. Since that time, they have been washing up on beaches around the world.

The BBC has put together a map of the countries and cities where pieces have been found. Some have traveled as far as Australia. Children and collectors have been happy to find them, but they are a problem for wildlife. They are very small, and birds and fish have eaten them.

Another problem is that petroleum-based plastic never goes away. It can degrade, or get smaller and smaller, until it's the size of a molecule, but it never disappears. It's still in the water for sea life and birds to ingest. Eventually it reaches the human food chain. Plastic also releases toxic chemicals as it breaks down, and these chemicals harm sea life.

People are more aware of the problem, and volunteer groups have formed to pick up the pieces along with other plastic litter. However, they face an uphill battle with so much plastic in the oceans and so many little floating pieces.

Do you know these words?  
- freak  
- petroleum  
- molecule  
- ingest  
- human food chain  
- toxic  
- harm  
- litter  
- uphill battle

**Part I.** Read the blog entry by author Stacy Hagen. Look at the words in blue. Work with a partner and explain the article usage (or lack of an article) for each.

#### BlueBookBlog An “Aha” Moment In Language Learning

When I was a college **student**, I went to Austria for a year to study German. I had studied German for two years at a university, but I wanted to learn the **language** in more authentic surroundings. I was a shy learner at first because my spoken German wasn't very strong. There was a **technique** I found especially helpful in those early days. I listened to the news on the radio in the morning. Usually I listened for an hour a day while I was doing other things such as getting ready in the morning or cleaning. I didn't listen carefully, and sometimes I just had it on as background noise. But I always had on news or talk radio, not music.

**People** on the news use a lot of passive sentences. I had studied a lot of complicated German grammar in college, and the passive was especially confusing to me. I really didn't understand the rules, so it wasn't part of my spoken German. But one morning I woke up after about three months, and I knew the **passive**! I could use all of the forms effortlessly.

This was my “aha” moment. I realized that I had been learning even when I hadn't been studying. The **rules** I had learned in college helped me, but listening to the radio turned that knowledge into usage. And the radio was an especially effective way to learn because it required **listening**. There were no clues from the speaker's face or actions to help me. All of this was a powerful **lesson** for me.

Have you found some especially helpful techniques for learning English? Have you had an “aha” moment?

**Part II.** Discuss these questions in small groups. Then write about your own experiences as a second language learner.

1. How much English do you speak and read outside the classroom?
2. Is using English in class sufficient for you to meet your language-learning goals?
3. What are some good ways to practice English outside the classroom?
4. Do you avoid certain situations if you have to speak English? For example, speaking on the phone? Attending a party? Participating in class discussion?
5. Are you afraid of making mistakes when you speak? Everyone who is learning a second language makes mistakes. It's part of the process. Do mistakes matter?
6. Are there aspects of English grammar that are especially hard for you?

7. Think about your language-learning experience. What techniques have you found especially helpful for learning English?
8. Have you had an “aha” moment yet while learning English?

### WRITING TIP

One way to organize your writing is to begin with more general information. As your writing progresses, give more detailed information. For example, you can begin by describing the type of language learner you are, overall. Then choose one or two specific problems you are having. Give details about these problems. End by describing how you deal with or possibly have solved these problems.

### Part III. Edit your writing.

1. Use this list to check your article usage:

Is the noun specific?

If *yes*: Use **the** for singular count nouns.

Use **the** for plural count nouns.

Use **the** for noncount nouns.

If *no*: Use **a/an** for singular count nouns.

Use **Ø** for plural count nouns.

Use **Ø** for noncount nouns.

Exception: Are you making a general statement about an invention or instrument? Use **the** with the singular count form of the noun.

2. Underline any titles and place names in your writing. Review Chart 7-5 for correct use of titles and place names.
3. Check for correct spelling (use a dictionary or spell-check)

Do you know these words?

- stance
- hunch over
- expand
- hormone
- dominant
- measurable

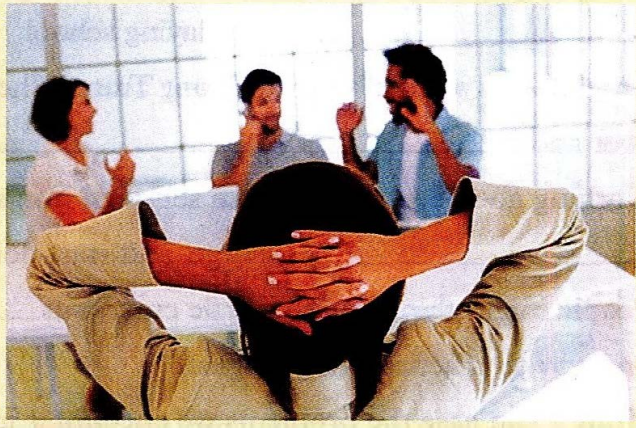

## Power Stances

Body language has a powerful influence on how other people see us. But did you know it also affects the way we see ourselves? Amy Cuddy, a Business School professor at Harvard, gave a TED\* talk on power stances titled, "Your Body Language Shapes Who You Are." It was so popular that the video has since gone viral.

Cuddy said that when people feel weak, they close up their bodies. They may hunch over or close their arms around themselves. They are trying to avoid taking up space. This is a low-power position.

People who feel strong do the opposite. They try to expand their space. They raise their arms the way runners do when they win a race. They lean back in their chairs and put their hands behind their heads. These are high-power stances. High-power stances project confidence. With these postures, people send the message that they have confidence in themselves.

According to Cuddy, high-power stances affect the chemicals in our bodies. Just holding a power stance for two minutes increases testosterone, a hormone that makes us feel dominant, and decreases cortisol, a hormone that causes stress. It's not just that we appear stronger to others; there are measurable changes in our body chemistry, and we feel differently about ourselves.

\*TED = Technology, Education, and Design

**Part II.** Discuss these questions in small groups.

1. What basic power stances are discussed in the reading?
2. Are these power stances acceptable in your culture?

In (c) and (d): <b>You</b> means "any person, people in general." <b>One</b> is much more formal than <b>you</b> . Impersonal <b>you</b> , rather than <b>one</b> , is used more frequently in everyday English. Impersonal <b>you</b> is not acceptable in academic writing.
(c) <b>You</b> should always be polite. (d) How do <b>you</b> get to Fifth Avenue from here?	
(e) Iowa is an agricultural state. <b>They</b> grow a lot of corn there.	<b>They</b> is used as an impersonal pronoun in spoken or very informal English to mean "people in general" or "an undefined group of people." Often the antecedent is implied rather than stated. In (e): <b>They</b> = farmers in Iowa

**EXERCISE 25 ▶ Reading, writing, and speaking. (Chart 8-5)**

**Part I.** A common problem in academic writing is switching between the pronouns *they* and *you*. Typically, an unskilled writer begins by talking about people in general by using *they*, and then switches to the impersonal and informal *you*. Read the following example from a student paper.

Do you know these words?  
 - impact                      - extended  
 - addiction                  - isolated  
 - anxious                     - potentially  
 - interaction                 - monitor  
 - initiate

**The Negative Impact of Social Media on Children and Teens**

Many parents have concerns about the impact of social media on their children. One danger is Internet addiction: kids want to have their phones or computers with them at all times. They become anxious if they can't answer an email or message immediately. They want to do their homework while they are chatting with friends. Teenagers say you can concentrate and still check social media. However, parents worry that their children need constant interaction and cannot handle quiet time.

Another problem is that social media takes away from in-person contact. Children and teenagers are at risk of interacting with screens more than they interact with one another. Texting and chatting online are not the same as actual conversation. You need to learn how to initiate and engage in extended conversations with people. Additionally, when you don't have much human contact, you can become isolated.

A third concern is that social media exposes children and teens to potentially inappropriate content. Parents can monitor their posts, but you can't control other people's posts. There's a good chance your child will see something before you even know about it.

**Part II.** It is clear that *you* in these paragraphs means "people in general." However, this usage of "you" in academic writing is not acceptable. Correct all the errors in pronoun usage.

**Part III.** In small groups, discuss the advantages and/or disadvantages of social media. Give your opinion. Then share some of the most common opinions from your group with the class.

## EXERCISE 38 ▶ Reading and writing. (Chapter 8)

**Part I.** Read the passage. Underline each sentence that introduces a reason.

### Is checking text messages in a meeting appropriate?

Checking text messages in a meeting sends a negative message. First, it is disrespectful. When people check messages, they aren't paying attention to others in the meeting. It is impossible to read messages and listen to the speaker at the same time. Another problem is that the speaker expects the other members to participate in some way. Maybe they are at the meeting because they need to learn new information or perhaps they need to help problem-solve an issue. They can't participate when they are looking at their phone. Finally, when people check messages, they send the message that their lives are more important than the content of the meeting. This superior attitude can make other people resentful.

**Part II.** Choose one question and give three reasons. Then write a one-paragraph response based on your reasons.

1. Is checking text messages in class appropriate?
2. What are three advantages/disadvantages of social media?
3. What are three advantages/disadvantages of the Internet?

## 9-1 Basic Modal Introduction

Modal auxiliaries generally express speakers' attitudes. For example, modals can express that a speaker feels something is necessary, advisable, permissible, possible, or probable; and, in addition, they can convey the strength of those attitudes. Each modal has more than one meaning or use. See Chart 10-11, pp. 208-209, for a summary of modals.

### Modal auxiliaries in English

can	had better	might	ought (to)	should	would
could	may	must	shall	will	

### Modal Auxiliaries

I You He She It We You They	}	+	{	<i>can do it.</i>
				<i>could do it.</i>
				<i>had better do it.</i>
				<i>may do it.</i>
				<i>might do it.</i>
				<i>must do it.</i>
				<i>ought to do it.</i>
				<i>shall do it.</i>
				<i>should do it.</i>
				<i>will do it.</i>
<i>would do it.</i>				

Modals do not take a final *-s*, even when the subject is *she*, *he*, or *it*.

*CORRECT: She can do it.*

*INCORRECT: She ~~can-s~~ do it.*

Modals are followed immediately by the simple form of a verb.

*CORRECT: She can do it.*

*INCORRECT: She can ~~to~~ do it. / She can ~~does~~ it. / She can ~~did~~ it.*

The only exception is *ought*, which is followed by an infinitive (*to + the simple form of a verb*).

*CORRECT: He ought to go to the meeting.*

See Appendix Chart B-1 for question forms and D-1 for negative forms with modals.

### Phrasal Modals

*be able to do it*  
*be going to do it*  
*be supposed to do it*  
*have to do it*  
*have got to do it*

Phrasal modals are common expressions whose meanings are similar to those of some of the modal auxiliaries. For example: *be able to* is similar to *can*; *be going to* is similar to *will*.

An infinitive (*to + the simple form of a verb*) is used in these similar expressions.

## EXERCISE 2 ▶ Looking at grammar. (Chart 9-1)

Complete the sentences with *to* or  $\emptyset$  as necessary.

The meaning in (c): <i>I need to do this, and I need to do that.</i> <b>Must</b> is typically stronger than <b>have to</b> and indicates urgency or importance. <b>Must</b> is usually found in rules, written instructions, or legal information. The meaning in (d): <i>This is very important!</i> Adults also use <b>must</b> when talking to young children about rules, as in (e). <b>Have to</b> , not <b>must</b> , is commonly used in questions, as in (f).

(l) I <b>have got to go</b> ("I've gotta go / I gotta go") now.	The usual pronunciation of <b>got to</b> is "gotta." Sometimes <b>have</b> is dropped in speech: "I gotta do it."

## 9-4 Advisability/Suggestions: *Should, Ought To, Had Better, Could*

<p>(a) You <i>should study</i> harder. You <i>ought to study</i> harder.</p> <p>(b) Drivers <i>should obey</i> the speed limit. Drivers <i>ought to obey</i> the speed limit.</p>	<p><b>Should</b> and <b>ought to</b> both express advisability. Their meaning ranges in strength from a suggestion (<i>This is a good idea</i>) to a statement about responsibility or duty (<i>This is a very important thing to do</i>).</p> <p>The meaning in (a): <i>This is a good idea. This is my advice.</i> In (b): <i>This is an important responsibility.</i></p>
<p>(c) I <i>ought to</i> (“otta”) <i>study</i> tonight, but I think I’ll watch TV instead.</p>	<p>Native speakers often pronounce <b>ought to</b> as “otta” in informal speech.</p>
<p>(d) You <i>shouldn’t leave</i> your keys in the car.</p>	<p>Negative contraction: <b>shouldn’t</b></p> <p>NOTE: the /t/ is often hard to hear in relaxed, spoken English.</p> <p><b>Ought to</b> is not commonly used in the negative.</p>
<p>(e) The gas tank is almost empty. We <i>had better stop</i> at the next gas station.</p> <p>(f) You <i>had better take</i> care of that cut on your hand soon, or it will get infected.</p>	<p>In meaning, <b>had better</b> is close to <b>should</b> and <b>ought to</b>, but <b>had better</b> is usually stronger. Often <b>had better</b> implies a warning or a threat of possible bad consequences.</p> <p>The meaning in (e): <i>If we don’t stop at a gas station, there will be a bad result. We will run out of gas.</i></p> <p>Notes on the use of <b>had better</b>:</p> <ul style="list-style-type: none"> <li>• It has a present or future meaning.</li> <li>• It is followed by the simple form of a verb.</li> <li>• It is more common in speaking than writing.</li> </ul>
<p>(g) You’d <i>better</i> take care of it.</p>	<p>Contraction: <b>’d better</b>, as in (g).</p> <p>In spoken English, you may not hear the “d” in <b>you’d</b>. However, “d” is necessary in writing.</p>
<p>(h) You’d <i>better not</i> be late.</p>	<p>Negative form: <b>had better + not</b></p>
<p>(i) – I’m having trouble in math class. – You <i>could talk</i> to your teacher. OR – You <i>could ask</i> Ann to help you with your math lessons. OR – I <i>could try</i> to help you.</p> <p>(j) You <i>should talk</i> to your teacher.</p> <p>(k) <i>Maybe</i> you <i>should talk</i> to your teacher.</p>	<p><b>Could</b> can also be used to make suggestions. The meaning in (i): <i>I have some possible suggestions for you. It is possible to do this. Or it is possible to do that.</i></p> <p><b>Should</b> is stronger and more definite than <b>could</b>. The meaning in (j): <i>I believe it is important for you to do this. This is what I recommend.</i></p> <p>In (k), <b>maybe</b> softens the strength of the advice.*</p>

\*Two other common ways to give softer suggestions are with the expressions **might want** and **I would**: *You might want to talk to your teacher.* OR *I would talk to your teacher.* The meaning in the latter is: *If I were you, I would ...* . In speaking, this is often shortened to **I would ...** . You will study this verb form more in Chapter 20.

Dear Aunt Kate,

I need your help! I'm having a problem with my roommate and I don't know what to do. I hope you don't mind. You always give me good advice.

We've only lived together in the dorm a month, but she's driving me crazy. Our room is always a mess. She never puts anything away. I have to walk over her clothes to get to my bed. Her books and papers are everywhere too. We don't have a lot of space, so a lot of her stuff is in my space.

I've mentioned that we need to clean more often, but she just rolls her eyes. I've picked up her stuff and put it on her bed, but she doesn't get the hint. The next day, it's all over the room again. Help!!

Lillian

Dear Lillian,

It sounds like you've been very gentle with your roommate (good for you!), but at this point, I think you should be more direct. You've told her "we" need to clean. I'm guessing that your part of the room is already clean. You really mean "you." And your friendly hints haven't worked. There are a few ways you could handle this.

You might want to sit down with her and say, "I really like you (if you do), but our roommate arrangement isn't working. It's important for me to have a cleaner room." Then tell her specifically what changes you would like to see.

If she still refuses to change, you could get a piece of chalk and draw a line on the floor (seriously!). You could tell her that all her stuff has to be on her side of the line. Anything that goes over, you could put in a bag.

If she absolutely won't make any changes, I would talk to a dorm advisor and ask for suggestions. I think it's important that you find a solution. College is stressful enough as it is!

Good luck, and let me know what happens.

Aunt Kate

9-8 Requests and Responses with Modals	
<b>"I" as the Subject: May, Could, Can</b>	
(a) <i>May I borrow</i> your pen (please)? (b) <i>Could I</i> (please) <i>borrow</i> your pen? (c) <i>Can I borrow</i> your pen?	<p><b>May I</b> and <b>could I</b> are used to request permission. <b>May I</b> sounds more formal.*</p> <p>NOTE in (b): In a polite request, <b>could</b> has a present or future meaning, not a past meaning.</p> <p><b>Can I</b> is usually considered less formal than <b>may I</b> or <b>could I</b>.</p>
TYPICAL RESPONSES Certainly. Yes, certainly. Of course. Yes, of course. Yes, you may. Yes, you can. INFORMAL: Sure.	<p>Often the response to a polite request is an action, such as a nod or shake of the head, or a simple "uh-huh," meaning "yes."</p> <p>Both <b>may</b> and <b>can</b> express permission. <b>May</b> is more formal than <b>can</b>.</p>
<b>"You" as the Subject: Would, Could, Will, Can</b>	
(d) <i>Would you pass</i> the salt (please)? (e) <i>Will you</i> (please) <i>pass</i> the salt?	<p><b>Would you</b> and <b>will you</b> in a polite request have the same meaning. <b>Would you</b> is more common and is often considered more polite. The degree of politeness, however, is often determined by the speaker's tone of voice.</p>
(f) <i>Could you pass</i> the salt (please)?	<p>Basically, <b>could you</b> and <b>would you</b> have the same meaning, and they are equally polite.</p> <p><b>Would you</b> = <i>Do you want to do this please?</i>  <b>Could you</b> = <i>Do you want to do this please, and is it possible for you to do this?</i></p>
(g) <i>Can you</i> (please) <i>pass</i> the salt?	<p><b>Can you</b> is often used informally. It usually sounds less formal than <b>could you</b> or <b>would you</b>.</p> <p><b>May</b> is not possible in (g). In polite requests, <b>may</b> is only used with <b>I</b> or <b>we</b>.</p> <p>INCORRECT: <i>May you pass the salt?</i></p>
TYPICAL RESPONSES Yes, I'd (I would) be happy to / be glad to. Certainly. INFORMAL: Sure.	<p>A person usually responds in the affirmative to a polite request. If a negative response is necessary, a person might begin by saying, "I'd like to, but ..." (e.g., "I'd like to pass the salt, but I can't reach it.").</p>

\***Might** is also possible: *Might I borrow your pen?* **Might I** is quite formal and polite; it is used much less frequently than **may I** or **could I**.

Sometimes, in informal spoken English, the simple present is used, as in (c).

Notice in (e): *Would you mind* is followed by the *-ing* form of a verb (a gerund).

The meaning in (e): *I don't want to cause you any trouble, but would you please open the window? Would that cause you any inconvenience?*

The informal responses "Sure" and "OK" are common but not logical. The speaker means *No, I wouldn't mind* but seems to be saying the opposite: *Yes, I would mind*.

Native speakers understand that the response "Sure" or "OK" in this situation means that the speaker agrees to the request.

\*The simple past does not refer to past time after *would you mind*; it refers to present or future time. See Chart 20-3, p. 430, for more information.

### EXERCISE 34 ▶ Looking at grammar. (Chart 9-9)

Make sentences using *Would you mind*.

B: I'm sorry. I didn't understand what you said. *Would you mind (repeat) \_\_\_\_\_ repeating \_\_\_\_\_ that?*

B: Unh-uh.

### EXERCISE 36 ▶ Listening. (Chart 9-9)

Listen to each request. Choose the expected response (a. or b.). In relaxed speech, *you* in *would you* may sound like "ju" or "juh."

**Example:** You will hear: This room is stuffy. *Would you mind if I opened the door?*  
You will choose:  a. No, of course not.      b. Yes.

- |            |                            |             |                     |

3. Let's go shopping.
4. Why don't we fly to Rome for lunch?
5. Let's play video games.
6. Why don't we clean and do the laundry?

## 9-10 Making Suggestions: *Let's, Why Don't, Shall I / We*

(a) <i>Let's go</i> to a movie.	<b>let's = let us</b> <b>Let's</b> means <i>I have a suggestion for us</i> . <b>Let's</b> is followed by the simple form of a verb.
(b) <i>Let's not go</i> to a movie. <i>Let's stay</i> home instead.	Negative form: <b>let's</b> + <b>not</b> + <i>simple verb</i>
(c) <i>Why don't we go</i> to a movie? (d) <i>Why don't you come</i> around seven? (e) <i>Why don't I give</i> Mary a call?	<b>Why don't</b> is used primarily in spoken English to make a friendly suggestion. The meaning in (c): <i>Let's go to a movie</i> . In (d): <i>I suggest that you come around seven</i> . In (e): <i>Should I give Mary a call? Do you agree with my suggestion?</i>
(f) <i>Shall I open</i> the window? Is that OK with you? (g) <i>Shall we leave</i> at two? Is that OK?	When <b>shall</b> is used with <i>I</i> or <i>we</i> in a question, the speaker is usually making a suggestion and asking another person if she/he agrees with this suggestion, as in (f) and (g). The use of <b>shall</b> + <i>I/we</i> is relatively formal and infrequent in American English.
(h) Let's go, <i>shall we?</i> (i) Let's go, <i>OK?</i>	Sometimes <b>shall we?</b> is used as a tag question after <b>let's</b> , as in (h). More informally, <b>OK?</b> is used as a tag question, as in (i).

## EXERCISE 40 ▶ Reading and speaking. (Chapter 9 Review)

**Part I.** Read the passage from a handbook for incoming freshmen. Underline the modal (or phrasal modal) verbs. With a partner or in small groups, discuss their meaning.

### A Challenge for College Freshmen

Freshman year can turn out to be the most challenging time in college for students. The transition from high school to college or university involves many changes. One of the biggest differences is the amount of freedom you must learn to manage.

In high school, your life is very structured, and you generally can't choose how you spend your day. It begins and ends at the same time. Teachers take attendance and check homework. They tell you (or your parents) about missing assignments and low grades. Many give daily homework so that there is not too much work at one time.

However, college life is much more unstructured. The class schedule might not be the same every day. You can sleep in one morning and have to be up early the next. If you decide to skip a class, there is probably no one there to say you can't do that.

College professors don't have to take attendance or check whether their students have completed assignments. Instructors may have all their assignments on a syllabus

and not even mention them in class. They might not remind you about deadlines or missing work.

You may hear an instructor say, "I am not your parent." Or even, "I am not a babysitter."

You may find you have large blocks of unscheduled time. There are fewer classes each day than in high school, and you will probably not have every class every day. A two- or three-credit class may meet only once or twice a week. Instructors view these longer stretches of time between classes as valuable opportunities for studying. They often assign hefty amounts of reading, but with so many extra-curricular activities available, not to mention social media and Internet distractions, this study time can quickly evaporate. Your grades may suffer if you can't manage time well. Some students don't realize they are in trouble until it is too late.

With an understanding of the challenges ahead, you can prepare in advance. Most colleges offer programs to help students with their transition, and there are many online resources available. The key is to remember that the responsibility for time management rests with you, not with your parents or teachers.

Do you know these words?  
- challenging  
- stretches (of time)  
- hefty  
- extra-curricular  
- not to mention  
- evaporate  
- grades may suffer

**Part II.** In small groups, answer the questions. Then discuss your answers as a class.

1. What are some major distractions for today's student? For you?
2. If you are or were a college freshman, what are/were some of the challenges you had moving from high school to college?
3. Has time management with assignments and studying ever been a problem for you?
4. Do you like to have structure in your day? If so, how do you create it?
5. What recommendations would you give a student who needs to manage time more effectively? Make a list, and use *should/should not/ought to/had better* in your sentences. You can check online resources for ideas.

### EXERCISE 41 ▶ Writing or speaking. (Chapter 9 Review)

Work with a partner. What would you say for each of the following situations? Use some of the words in the box to come up with at least three possibilities. Share some of your answers with the class.

**Example:** Imagine that you are an apartment manager. You are talking to a person who is interested in renting an apartment. There is some information about apartment regulations you need to give him/her.

→ *You must not smoke anywhere in the building.*

→ *You have to recycle all paper products and glass.*

→ *Quiet time is 10 P.M. to 7 A.M. You are not supposed to play loud music or make a lot of noise during those hours. ...*

should	had better	must	had better not
be supposed to	have to	shouldn't	do not have to
ought to	have got to	be not supposed to	must not

1. Imagine that you are a tour guide and you are helping two students who have arrived for a vacation (choose the place). You want to explain some of the local customs of the places they will be visiting.
2. Imagine that you are the manager of a café and you are talking to two new employees. You want to acquaint them with their jobs and your expectations.
3. Imagine that you are a computer lab instructor and you need to talk to new students about rules for using the computer lab.

### EXERCISE 42 ▶ Check your knowledge. (Chapter 9 Review)

Correct the errors.

2. A film director ~~must has~~ control over every aspect of a movie.
3. I'm sorry. I don't have training in this area. I ~~not able~~ help you.
4. You don't have to have your cell phone on during the test. If you do, you will fail.

## EXERCISE 43 ▶ Reading and writing. (Chapter 9)

**Part I.** Read the web article. Underline the verbs with modals (or phrasal modals).

Do you know these words?  
- anxiety - retrieve  
- blank mind - nausea  
- racing thoughts - cramping  
- symptoms

www.irLanguage.com

# Test Anxiety

A fast heartbeat, a blank mind, and racing thoughts — these are but a few of the symptoms of test anxiety. It is not unusual for students to feel nervous before tests, but some people become so nervous that they can't think clearly. During the test, they aren't able to understand the questions, and they can't retrieve information they already know. Some students might actually begin to feel physically sick. Nausea, cramping, and headaches are a few of the symptoms that students may have during or even days before a test. In some cases, anxiety can be so severe that otherwise successful students are unable to pass tests.

**Part II.** Write a paragraph to answer one of the following questions. Use modals in your answer. You may find it helpful to do research on the Internet.

1. What suggestions do you have for a person with test anxiety? Think about what the person can do before the test as well as during it.
2. What can teachers do to help students feel more relaxed when they take a test? Think about test review and preparation as well as the classroom atmosphere.

### WRITING TIP

When you write, it is important to avoid excessive repetition of the same words. Instead, try to vary your wording. For example, if you are giving suggestions, you don't want to use *should* for all your sentences. Use other modals that communicate the same idea (*ought to/could/etc.*).

**Part III.** Edit your writing. Check for the following:

1.  use of modals to express possibility, uncertainty, etc.
2.  correct forms for *be able to*
3.  no *-s* on the main verb after a modal
4.  use of different modals with the same meaning to avoid repetition
5.  correct spelling (use a dictionary or spell-check)

**PRETEST: What do I already know?**

Write “C” if a sentence has the correct modal verb in form and meaning and “I” for incorrect. Check your answers below. After you complete each chart listed, make any necessary corrections.

1. \_\_\_ When I was little, I would carry a blanket with me at all times. (10-1)
2. \_\_\_ Nancy’s passport has expired. She should have renewed it last month. (10-2)

Are the meanings of the two sentences the same or different?

1. When I was a child, I used to build sandcastles at the beach.
2. When I was a child, I would build sandcastles at the beach.

## 10-1 Using *Would* to Express a Repeated Action in the Past

<p>(a) When I was a child, my father <i>would read</i> me a story at night before bedtime.</p> <p>(b) When I was a child, my father <i>used to read</i> me a story at night before bedtime.</p>	<p><i>Would</i> can be used to express <i>an action that was repeated regularly in the past</i>. When <i>would</i> is used to express this idea, it has the same meaning as <i>used to (habitual past)</i>. Sentences (a) and (b) have the same meaning. <i>Would</i> is more common for this purpose than <i>used to</i> in academic writing.</p>

<b>10-4 Degrees of Certainty: Present Time</b>	
<p>— Why isn't John in class?</p> <p><b>100% sure:</b> He <i>is</i> sick.</p> <p><b>95% sure:</b> He <i>must be</i> sick.</p> <p><b>50% sure or less:</b> { He <i>may be</i> sick. He <i>might be</i> sick. He <i>could be</i> sick.</p> <p>NOTE: These percentages are approximate.</p>	<p><i>Degree of certainty</i> refers to how sure we are — what we think the chances are — that something is true.</p> <p>If we are sure something is true in the present, we don't need to use a modal. For example, if I say, "John is sick," I am sure; I am stating a fact that I am sure is true. My degree of certainty is 100%.</p> <p>NOTE: <b>Can</b> does not express degrees of certainty.</p> <p><b>INCORRECT:</b> He <del>can be</del> sick.</p>
<p>— Why isn't John in class?</p> <p>(a) He <i>must be</i> sick.</p> <p>(Usually he is in class every day, but when I saw him last night, he wasn't feeling good. So my best guess is that he is sick today. I can't think of another possibility.)</p>	<p><b>Must</b> expresses a strong degree of certainty about a present situation, but it is still less than 100%.</p> <p>In (a): The speaker is saying, "Probably John is sick. I have evidence to make me believe that he is sick. That is my logical conclusion, but I do not know for certain."</p>
<p>— Why isn't John in class?</p> <p>(b) He <i>may be</i> sick.</p> <p>(c) He <i>might be</i> sick.</p> <p>(d) He <i>could be</i> sick. (I don't really know. He may be at home watching TV. He might be at the library. He could be out of town.)</p>	<p><b>May, might, and could</b> express a weak degree of certainty.</p> <p>In (b), (c), and (d): The meanings are all the same. The speaker is saying, "Perhaps, maybe, possibly John is sick. I am only making a guess. I can think of other possibilities."</p>
<p>(e) <i>Maybe</i> he is sick.</p>	<p>In (e): <b>maybe</b> (one word) is an adverb.</p> <p>In (b): <b>may be</b> (two words) is a verb form.</p>

## EXERCISE 18 ▶ Looking at grammar. (Chart 10-4)

Complete the sentences by using **must** or **may/might/could** with the expressions in the box or your own words.

- |                 |                       |                     |
|-----------------|-----------------------|---------------------|

PARTNER A	PARTNER B
1. The students are yawning. Why?	1. The bride is crying. Why?
2. Carol has goose bumps on her arms. Why?	2. Katrina is blushing. Why?

## 10-5 Degrees of Certainty: Present Time Negative

100% sure:	Sam <i>isn't</i> hungry.
99% sure:	{ Sam <i>couldn't be</i> hungry. Sam <i>can't be</i> hungry.
95% sure:	Sam <i>must not be</i> hungry.
50% sure or less:	{ Sam <i>may not be</i> hungry. Sam <i>might not be</i> hungry.

NOTE: These percentages are approximate.

(a) Sam doesn't want anything to eat. He <i>isn't</i> hungry. He told me his stomach is full. I heard him say that he isn't hungry. I believe him.	In (a): The speaker is sure that Sam is not hungry.
(b) Sam <i>couldn't/can't be</i> hungry. That's impossible. I just saw him eat a huge meal. He has already eaten enough to fill two grown men! Did he really say he'd like something to eat? I don't believe it.	In (b): The speaker believes that there is no possibility that Sam is hungry (but the speaker is not 100% sure). When used in the negative to show degree of certainty, <b>couldn't</b> and <b>can't</b> forcefully express the idea that the speaker believes something is impossible.
(c) Sam isn't eating his food. He <i>must not be</i> hungry. That's the only reason I can think of.	In (c): The speaker is expressing a logical conclusion, a "best guess."
(d) I don't know why Sam isn't eating his food. He <i>may not/might not be</i> hungry right now. Or maybe he doesn't feel well. Or perhaps he ate just before he got here. Who knows?	In (d): The speaker uses <b>may not/might not</b> to mention a possibility.

### EXERCISE 22 ▶ Let's talk: pairwork. (Chart 10-5)

Work with a partner. Give possible reasons for Speaker B's conclusions.

**Example:** A: Someone is knocking at the door. It might be Lillian.

- A: Look at that animal. Is it a wolf?  
B: It couldn't be a wolf. (*Reason?*)
- A: Someone told me that Marie quit her job.  
B: You're kidding! That can't be true. (*Reason?*)

### EXERCISE 23 ▶ Looking at grammar. (Chart 10-5)

SITUATION: You and your friend are at home in the evening. The power suddenly goes out. The weather is very calm, and there is no wind. ### EXERCISE 25 ▶ Warm-up. (Chart 10-6)

Decide which past modal in the box best completes each sentence. One of the modals is not appropriate for any of the sentences.

In (a): The speaker is sure.  
 In (b): The speaker is making a logical conclusion, e.g., "I saw Mary yesterday and found out that she was sick. I assume that is the reason why she was absent. I can't think of any other good reason."  
 In (c): The speaker is mentioning one possibility.

### Past Time: Negative

— Why didn't Sam eat?

                                   { Sam *might not have been* hungry.

In (d): The speaker is sure.  
 In (e): The speaker believes that it is impossible for Sam to have been hungry.

## What is the best way to read a textbook?

Do you use a highlighter pen when you read? For many students, especially at the college level, this has long been a common practice. However, recent research questions the value of highlighting passages in textbooks. In fact, you may want to discard the highlighter pen if you are only marking material instead of actively working with it. Highlighting is a passive skill. Learning is more effective when you can interact with the text. Here are some recommended techniques that can help you read and remember material more efficiently.

A first step is to look at the headings, subheadings, lists, examples, charts, and graphs in the chapter. These can serve as a roadmap for what is important in the reading. For example, if a section has the heading *Salt and High Blood Pressure*, an important question to ask is “What is the connection between *salt and high blood pressure*?” You should write down such questions and try to find the answers in the reading.

Usually you do not have to read every word carefully. Textbooks are written for large

populations of students; instructors often have a more specific focus, and they usually don't have the time to cover everything in one course. Instructors specify learning objectives, and you can find them in your syllabus and assignments. You can also pick up on themes from the questions that instructors ask. It's important to connect all this with the information you are reading.

A very important tool for reading more deeply is annotation, or adding notes. One way to annotate is to write notes in the margin. These notes explain or summarize key points. Annotations can be brief. If you need more space, you can write in a separate notebook rather than in the margins. After you annotate, put your notes into a short summary. You only need to mention key ideas.

You may have purchased a used textbook that is already annotated. It is still best if you put the textbook material into your own words. That way your notes will be understandable. Additionally, reading another person's notes is a passive activity, like reading a textbook passage all over again.

Once you identify key concepts, you can write practice test questions based on the textbook material. Some students use online flashcard programs for their questions. Whatever the method, it is important that you quiz yourself repeatedly over many days. Spacing out your practice has proven to be more effective than studying information all at one time. Some researchers recommend that students teach the material to others as a way to learn it really well. Study groups may provide good opportunities for doing this.

Learning needs to be an active process. By taking some or all of these steps, you will interact with the material more and remember it better.

**Part II.** Reread the passage and annotate each paragraph. Then in small groups, identify the key points. Together, write at least five test questions that you can use for review.

### **EXERCISE 53 ▶ Reading and writing. (Chapter 10)**

**Part I.** Read the following summary. Does the summary match your ideas of the key points in the previous reading?

#### **Summary: What is the best way to read a textbook?**

For students to understand textbook reading material well, they must be active learners. Highlighting is a passive activity. Students instead need to put the ideas into their own words. They should write notes, either in the margin or in a notebook, and then summarize key information. They can use the chapter organization as a guide, for example, and focus on headings, subheadings, and lists. Students should also find out the information the instructor considers important and pay attention to this when they read. After they identify the key information, they ought to make self-study quizzes, so they can test themselves many times in the days before an exam.

**Part II.** Find a textbook passage or online article that provides advice on how to do something. Your instructor will tell you how long it should be. Annotate the key points. Then write a summary, using modal verbs appropriately.

#### **WRITING TIP**

A summary is much shorter than the original passage or article. When you write a summary, you highlight the essential points without repeating ideas, and without bringing in your own conclusions or opinions.

Here is one effective, two-step approach to developing a summary:

1. Write a topic sentence that provides an overview, tying your ideas together.
2. Write one sentence summarizing each paragraph of the passage or article. Make sure your individual summarizing sentences flow together in meaningful paragraphs, as in the example above.

**Part III.** Edit your writing. Check for the following:

1.  correct forms for present modals
2.  correct forms for past modals
3.  correct meaning of modal verbs
4.  correct forms for phrasal modals
5.  correct spelling (use a dictionary or spell-check)

<p>Active: (a) <math>\overbrace{\text{Mary}}^{\text{subject}}</math> <math>\overbrace{\text{helped}}^{\text{verb}}</math> <math>\overbrace{\text{the boy.}}^{\text{object}}</math></p> <p>Passive: (b) <math>\overbrace{\text{The boy}}^{\text{subject}}</math> <math>\overbrace{\text{was helped}}^{\text{verb}}</math> by Mary.</p>	<p>In the passive, <i>the object</i> of an active verb becomes <i>the subject</i> of the passive verb: <b>the boy</b> in (a) becomes the subject of the passive verb in (b).</p> <p>Notice that the subject of an active verb follows <i>by</i> in a passive sentence. Tell the class where something that you're wearing or own was made (e.g., your shoes, shirt, cell phone, etc.). Do you know who made these items? Is it important to know?

<b>11-3 Using the Passive</b>	
(a) Rice <i>is grown</i> in India. (b) Our house <i>was built</i> in 1980. (c) This olive oil <i>was imported</i> from Crete.	Usually the passive is used without a <i>by</i> -phrase. The passive is most frequently used when it is not known or not important to know exactly who performs an action.  In (a): Rice is grown in India by people, by farmers, by someone. It is not known or important to know exactly who grows rice in India.  Examples (a), (b), and (c) illustrate the most common use of the passive, i.e., without the <i>by</i> -phrase.
(d) My aunt <i>made</i> this rug. ( <i>active</i> )	If the speaker knows who performs an action, usually the active is used, as in (d).
(e) This rug <i>was made</i> by my aunt. That rug <i>was made</i> by my mother. (f) <i>Huckleberry Finn</i> <i>was written</i> by Mark Twain.	Sometimes, even when speakers know who performs an action, they choose to use the passive with the <i>by</i> -phrase in order to focus attention on the subject of a sentence.  In (e): The focus of attention is on two rugs.  In (f): The focus is on the book, but the <i>by</i> -phrase is included because it contains important information.

### Early Writing Materials

The chief writing material of ancient times was papyrus. It was used in Egypt, Greece, and other Mediterranean lands. Parchment, another writing material that was widely used in ancient times, was made from the skins of animals, such as sheep and goats. After the hair had been removed, the skins were stretched and rubbed smooth to make a writing surface. Paper, the main writing material today, was invented by the Chinese.

Ink has been used for writing and drawing throughout history. No one knows when the first ink was developed. The ancient Egyptians and Chinese made ink from various natural substances such as berries, soot, and tree bark. Through the centuries, thousands of different formulas have been developed for ink. Most ink today is made from chemicals.

### EXERCISE 30 ► Reading and grammar. (Charts 11-1 → 11-5)

Read the blog entry by author Stacy Hagen. Underline the past participles. Which ones are used in the passive? Which past participle functions as an adjective?

## BlueBookBlog The Importance of Context

How important is context to reading? Extremely! In the 1970s, a famous study was conducted by Bransford and Johnson. Participants were asked to listen to a passage and then answer questions. The passage was similar to the following. Take a minute to read it:

This is a fairly easy process. It can be completed at home or at a different place if the necessary machinery isn't available. First, items are put into different groups. But if there isn't too much to deal with, one group may be enough. It's important to look at everything carefully; a mistake could ruin a group. This first phase doesn't take very long, especially the more times you do it. The next phase goes faster. Once it is taken care of, it won't require your attention until it is finished. At that point, the items will be separated again. These groups will determine where everything goes. Once things are put away, you have finished until the process is repeated the next time.

Did the reading make sense to you? If you were confused, you are not alone. It's difficult to make sense of. Then participants were given the title "Washing Clothes" and asked to read it again. Try this now.

As you can see, context makes a significant difference. That is why you have probably already learned how helpful it is to look at chapter heads and subheads when you are reading a textbook. And don't forget to look at photos and other illustrations even before you start to read — or do an exercise. All of this information will help you read more efficiently.

## EXERCISE 53 ▶ Reading, grammar, and writing. (Chapter 11)

**Part I.** Read the passage. The writer is describing a process. How many verbs are passive?

Do you know these words?

- liquor

- solid

- bitter

### How Chocolate Is Made

Chocolate is made from the seeds of roasted cocoa beans. After the seeds have been roasted, the inside of the seed is pressed into a liquid. This liquid is called chocolate liquor. The liquor contains fat, which is separated from the liquor. After this has been done, a solid is left. This solid, which is known as cocoa cake, is ground up and becomes unsweetened cocoa. This is a very bitter chocolate. To make it taste better, other substances such as cocoa butter and sugar are added later.

**Part II.** Write about a process that you know about. Maybe it's how to make something like a kite, a bookcase, a sweater, or a necklace. Try to use passive verbs where appropriate. Describe what happens first, second, third, etc.

#### WRITING TIP

The passive is very common (or even preferred) in scientific or technical writing (lab results, reports, etc.). The focus is not on the person, but on the details of the process or the results. The passive makes it easy to focus on this.

The present and present perfect passive are two very common tenses in this type of writing.

Some passive verbs common in writing are *collected, considered, done, found, given, made, measured, seen, shown, tested, and used.*

**Part III.** Edit your writing. Check for the following:

1.  a form of the *be* verb for the passive
2.  the correct past participle forms for the passive
3.  passive only with intransitive verbs
4.  use of *by* only when it is important to know who performed the action
5.  correct spelling (use a dictionary or spell-check)

1. "Watch out!" Mrs. Brooks said.
2. "Are you OK?" she asked.
3. "You look like you're going to fall off that ladder," she said.

## 12-6 Quoted Speech

*Quoted speech* refers to reproducing words exactly as they were originally spoken or written.\* Quotation marks (“...”) are used.\*\*

### Quoting One Sentence

(a) She said, “ <i>My</i> brother is a student.”	In (a): Use a comma after <b>she said</b> . Capitalize the first word of the quoted sentence. Put the final quotation marks outside the period at the end of the sentence.
(b) “My brother is a student,” she said.	In (b): Use a comma, not a period, at the end of the quoted sentence when it precedes <b>she said</b> .
(c) “My brother,” she said, “ <i>is</i> a student.”	In (c): If the quoted sentence is divided by <b>she said</b> , use a comma after the first part of the quote. Do not capitalize the first word after <b>she said</b> .

### Quoting More Than One Sentence

(d) “My brother is a student. He is attending a university,” she said.	In (d): Quotation marks are placed at the beginning and end of the complete quote. Notice: There are no quotation marks after <b>student</b> .
(e) “My brother is a student,” she said. “ <b>H</b> e is attending a university.”	In (e): Since <b>she said</b> comes between two quoted sentences, the second sentence begins with quotation marks and a capital letter.

### Quoting a Question or an Exclamation

(f) She asked, “When will you be here?”	In (f): The question mark is inside the closing quotation marks since it is part of the quotation.
(g) “When will you be here?” she asked.	In (g): Since a question mark is used, no comma is used before <b>she asked</b> .
(h) She said, “Watch out!”	In (h): The exclamation point is inside the closing quotation marks.
(i) “My brother is a student,” <b>said Anna</b> . “My brother,” <b>said Anna</b> , “is a student.”	In (i): The noun subject ( <b>Anna</b> ) follows <b>said</b> . A noun subject often follows the verb when the subject and verb come in the middle or at the end of a quoted sentence.  NOTE: A pronoun subject almost always precedes the verb. “My brother is a student,” <b>she said</b> .  VERY RARE: “My brother is a student,” <b>said she</b> .
(j) “Let’s leave,” <b>whispered</b> Dave. (k) “Please help me,” <b>begged</b> the homeless man. (l) “Well,” Jack <b>began</b> , “it’s a long story.”	Say and ask are the most commonly used quote verbs.  Some others: <i>add, agree, announce, answer, beg, begin, comment, complain, confess, continue, explain, inquire, promise, remark, reply, respond, shout, suggest, whisper.</i>

\**Quoted speech* is also called “direct speech.” *Reported speech* (discussed in Chart 12-7) is also called “indirect speech.”

\*\*In British English, quotation marks are called “inverted commas” and can consist of either double marks (”) or a single mark (’): *She said, ‘My brother is a student’.*

### EXERCISE 28 ▶ Looking at grammar. (Chart 12-6)

## The Grasshopper and the Ant

Once upon a time, there was a lazy grasshopper and an industrious ant. The grasshopper spent his summer days in the sun, chirping and hopping about. It never occurred to him to work. The ant, however, was getting ready for winter. He dragged seeds, leaves, and grains to his nest.

One day the grasshopper visited the ant. "It's such a nice day," he said. "Come out and play with me."

The ant shook his head. "I can't," he replied. "I have too much work to do. I need to get ready for the winter," he added. "You should do the same."

The grasshopper laughed and said, "I have plenty of food. And besides, winter is far away."

Winter came. The ant was snug in his nest, and the grasshopper was starving. There was no food to be found anywhere.

And the moral of the story is \_\_\_\_\_

## 12-7 Reported Speech

*Quoted speech* uses a person's exact words, and it is set off by quotation marks. *Reported speech* uses a noun clause to report what someone has said. No quotation marks are used.

NOTE: This chart presents general guidelines to follow. You may encounter variations.

Quoted Speech	Reported Speech																
(a) "The world <i>is</i> round." →	She <b>said</b> (that) the world <i>is</i> round.	The present tense is used when the reported sentence deals with a general truth, as in (a).  <b>That</b> is optional; it is more common in writing than speaking.															
(b) "I <i>work</i> at night." →	He <b>says</b> he <i>works</i> at night. He <b>has said</b> that he <i>works</i> at night. He <b>will say</b> that he <i>works</i> at night.	When the reporting verb is simple present, present perfect, or future, the verb in the noun clause does not change.															
(c) "I <i>work</i> at night." → (d) "I <i>am working</i> ." (e) "I <i>worked</i> ." (f) "I <i>have worked</i> ." (g) "I <i>had worked</i> ." →	He <b>said</b> he <i>worked</i> at night. He <b>said</b> he <i>was working</i> . He <b>said</b> he <i>worked/had worked</i> . He <b>said</b> he <i>had worked</i> . He <b>said</b> he <i>had worked</i> .	If the reporting verb (e.g., <i>said</i> ) is simple past, the verb in the noun clause will <i>usually</i> be in a past form. Here are some general guidelines:  <table style="width: 100%; border: none;"> <tr> <td>simple present</td> <td>→</td> <td>simple past</td> </tr> <tr> <td>present continuous</td> <td>→</td> <td>past continuous</td> </tr> <tr> <td>simple past</td> <td>→</td> <td>no change or past perfect</td> </tr> <tr> <td>present perfect</td> <td>→</td> <td>past perfect</td> </tr> <tr> <td>past perfect</td> <td>→</td> <td>no change</td> </tr> </table>	simple present	→	simple past	present continuous	→	past continuous	simple past	→	no change or past perfect	present perfect	→	past perfect	past perfect	→	no change
simple present	→	simple past															
present continuous	→	past continuous															
simple past	→	no change or past perfect															
present perfect	→	past perfect															
past perfect	→	no change															
(h) Immediate reporting: – What did the teacher just say? I didn't hear him. – He <b>said</b> he <i>wants</i> us to read Chapter 6.  (i) Later reporting: – I didn't go to class yesterday. Did Mr. Jones give any assignments? – Yes. He <b>said</b> he <i>wanted</i> us to read Chapter 6.		In spoken English, if the speaker is reporting something immediately or soon after it was said, no change is made in the noun clause verb.															
(j) " <i>Leave</i> ." →	She <b>told</b> me <i>to leave</i> .	In reported speech, an imperative sentence is changed to an infinitive. <b>Tell</b> is used instead of <b>say</b> as the reporting verb.*  See Chart 14-4, p. 308, for other verbs followed by an infinitive that are used to report speech.															

\*NOTE: **Tell** is immediately followed by a (pro)noun object, but **say** is not: *He told me he was late. He said he was late.*  
Also possible: *He said to me he was late.*

### EXERCISE 31 ► Looking at grammar. (Chart 12-7)

## EXERCISE 46 ▶ Reading and writing. (Chapter 12 Review)

**Part I.** Read the passage. Underline the three noun clauses. Which one has the subjunctive?

### Plagiarism

Simon is researching the topic of cell phone radiation for a term paper. He has found extensive information on the Internet. One paragraph in particular gives easy-to-understand information about radiation transmission. Simon is pleased that the information is very clear and pastes it into his paper. However, he changes the font so that it matches the rest of his paper.

What Simon has just done is commit plagiarism — the copying of someone else's work without citing the source. Think of it as the stealing of ideas. In the Internet age, it is very easy to copy and paste information into a paper. Colleges and universities have strict policies regarding plagiarism. In some cases, schools may fail or expel a student for plagiarism.

Generally plagiarism is explained in the student handbook. Many schools have "honor codes" that students agree to follow. It is essential that every student know the school policy regarding plagiarism.

**Part II.** Research information about the plagiarism policy at your school. If your school doesn't have a policy, choose a university in an English-speaking country to research. Write a paragraph summarizing the information. Use at least one noun clause with the subjunctive in your paragraph.

**EXERCISE 47 ▶ Reading and writing. (Chapter 12)**

**Part I.** Read the paragraph from a U.S. government website.\*

### Cell Phones and the Brain

Scientists are looking into a possible link between cell phone use and certain types of tumors. One type is called an acoustic neuroma (“ah-COOS-tik nur-OH-ma”). This type of tumor grows on the nerve that connects the ear to the brain. It doesn't cause cancer, but it may lead to other health problems, like hearing loss. Another type scientists are looking into is called a glioma (“glee-OH-ma”). This is a tumor found in the brain or central nervous system of the body.

\*Source: [http://www.cdc.gov/nceh/radiation/cell\\_phones\\_FAQ.html](http://www.cdc.gov/nceh/radiation/cell_phones_FAQ.html)

**Part II.** Now read two paraphrases of the paragraph. One way to avoid plagiarism is to paraphrase information — to express an author's ideas in your own words. What differences do you see between the two paraphrases? Which paraphrase seems most appropriate to you? Consider the following questions and discuss your opinions with your classmates:

1. In which paraphrase have the ideas been put into the writer's own words, without copying the sentence structure or the vocabulary of the original?
2. Which paraphrase uses synonyms for key words, while keeping a sentence structure similar to the original?

*Paraphrase 1*

Scientists are not sure if cell phones cause tumors, but they are looking at two types: an acoustic neuroma and a glioma. The first tumor doesn't cause cancer, but it can cause hearing problems. The second, a glioma, grows in the brain or central nervous system.

*Paraphrase 2*

Researchers are investigating a potential connection between cell phone usage and different kinds of tumors. One kind is named an acoustic neuroma. This kind of tumor is on the nerve between the ear and the brain. It's not the cause of cancer, but it may be responsible for other health issues, like deafness. Another kind researchers are investigating is a glioma. This is in the brain or central nervous system of the human body.

In the second case, the writer has supplied synonyms for key words, but the sentence structure is the same. It is too similar to the original and is therefore not acceptable.

**Part III.** Find a paragraph on a topic you are interested in and paraphrase it. Use at least one noun clause in your writing.

## WRITING TIP

A helpful strategy for paraphrasing is to read a passage several times and take notes. Then try not to look at your notes when you write so that you can express the information in your own words. When you are finished, compare your paraphrase with your notes to make sure you have covered everything.

**Part IV.** Edit your writing. Check for the following:

1.  all sentences contain a subject and a verb
2.  use of one or more noun clauses in your paragraph
3.  use of a singular subject when the noun clause begins the sentence
4.  correct word order in noun clauses (statement word order)
5.  correct spelling (use a dictionary or spell-check)

## 13-7 Using Adjective Clauses to Modify Pronouns

<p>(a) There is <i>someone</i> I want you to meet.</p> <p>(b) <i>Everything</i> he said was pure nonsense.</p> <p>(c) <i>Anybody</i> who wants to come is welcome.</p>	<p>Adjective clauses can modify indefinite pronouns (e.g., <i>someone, everybody</i>).</p> <p>Object pronouns (e.g., <i>who(m), that, which</i>) are usually omitted in the adjective clause, as in (a) and (b).</p>
<p>(d) Paula was <i>the only one</i> I knew at the party.</p> <p>(e) Scholarships are available for <i>those</i> who need financial assistance.</p>	<p>Adjective clauses can modify <i>the one(s)</i> and <i>those</i>.*</p>
<p>(f) <del>INCORRECT: I who am a student at this school</del> come from a country in Asia.</p> <p>(g) It is <i>I</i> who am responsible.</p> <p>(h) <i>He</i> who laughs last laughs best.</p>	<p>Adjective clauses are almost never used to modify personal pronouns. Native English speakers would not say or write the sentence in (f).</p> <p>Example (g) is possible, but very formal and uncommon.</p> <p>Example (h) is a well-known saying in which <i>he</i> is used as an indefinite pronoun (meaning “anyone” or “any person”).</p>

\*An adjective clause with **which** can also be used to modify the demonstrative pronoun **that**:

*We sometimes fear **that which** we do not understand.*

*The bread my mother makes is much better than **that which** you can buy at a store.*

- Which adjective clause can be omitted with no change in the meaning of the noun it modifies?
  - What do you notice about the use of commas?

## 13-8 Punctuating Adjective Clauses

General guidelines for the punctuation of adjective clauses:

- (1) **DO NOT USE COMMAS** if the adjective clause is necessary to identify the noun it modifies.\*
- (2) **USE COMMAS** if the adjective clause simply gives additional information and is not necessary to identify the noun it modifies.\*\*

(a) *The professor who teaches Chemistry 101* is an excellent lecturer.

In (a): No commas are used. The adjective clause is necessary to identify which professor is meant.

(b) *Professor Wilson, who teaches Chemistry 101,* is an excellent lecturer.

In (b): Commas are used. The adjective clause is not necessary to identify Professor Wilson. We already know who he is: he has a name. The adjective clause simply gives additional information.

(c) *Hawaii, which consists of eight principal islands,* is a favorite vacation spot.

GUIDELINE: Use commas, as in (b), (c), and (d), if an adjective clause modifies a proper noun. (A proper noun begins with a capital letter.)

(d) *Mrs. Smith, who is a retired teacher,* does volunteer work at the hospital.

NOTE: A comma reflects a pause in speech.

(e) *The man*  $\left\{ \begin{array}{l} \text{who(m)} \\ \text{that} \\ \emptyset \end{array} \right\}$  *I met* teaches chemistry.

In (e): If no commas are used, any possible pronoun may be used in the adjective clause. Object pronouns may be omitted.

(f) *Mr. Lee, whom I met yesterday,* teaches chemistry.

In (f): When commas are necessary, the pronoun **that** may not be used (only **who, whom, which, whose, where, and when** may be used), and object pronouns cannot be omitted.

**INCORRECT:** Mr. Lee, ~~that~~ I met yesterday, teaches chemistry.

COMPARE THE MEANING:

(g) We took some children on a picnic. *The children, who wanted to play soccer,* ran to an open field as soon as we arrived at the park.

In (g): The use of commas means that *all* of the children wanted to play soccer and *all* of the children ran to an open field. The adjective clause is used only to give additional information about the children.

(h) We took some children on a picnic. *The children who wanted to play soccer* ran to an open field as soon as we arrived at the park. The others played a different game.

In (h): The lack of commas means that *only some* of the children wanted to play soccer. The adjective clause is used to identify which children ran to the open field.

\*Adjective clauses that do not require commas are called *essential* or *restrictive* or *identifying*.

\*\*Adjective clauses that require commas are called *nonessential* or *nonrestrictive* or *nonidentifying*.

NOTE: Nonessential adjective clauses are more common in writing than in speaking.

### EXERCISE 38 ▶ Looking at grammar. (Chart 13-8)

- (b) Tom was late, **which** surprised me.
- (c) The elevator is out of order. **This** is too bad.
- (d) The elevator is out of order, **which** is too bad.

The pronouns **that** and **this** can refer to the idea of a whole sentence which comes before.

In (a): The word **that** refers to the whole sentence **Tom was late**.

Similarly, an adjective clause with **which** may modify the idea of a whole sentence.

In (b): The word **which** refers to the whole sentence **Tom was late**.

Using **which** to modify a whole sentence is informal and occurs most frequently in spoken English. This structure is generally not appropriate in formal writing. **Whenever** it is written, however, it is preceded by a comma to reflect a pause in speech.

Ellen needs 20 minutes to drive to the parking lot where (4) she leaves her car and boards the ferry. Once she's on the other side, she catches a bus that (5) takes her to her office. Traffic is usually heavy at that hour, so she's on the bus for another 30 minutes. On the bus, she usually reads reports that (6) she was too tired to finish the night before. The bus drops her off a few blocks from her office. Sometimes she stops at an espresso stand and picks up coffee for her co-workers, for which (7) they reimburse her later. ### 13-11 Reducing Adjective Clauses to Adjective Phrases

CLAUSE: A *clause* is a group of related words that contains a subject and a verb.

PHRASE: A *phrase* is a group of related words that does not contain a subject and a verb.

(a) CLAUSE: The girl **who is sitting next to me** is Mai.

(b) PHRASE: The girl **sitting next to me** is Mai.

(c) CLAUSE: The girl (**whom**) **I saw** was Mai.

(d) PHRASE: (**none**)

An adjective phrase is a reduction of an adjective clause. It modifies a noun. It does not contain a subject and verb.

Examples (a) and (b) have the same meaning.

Only adjective clauses that have a subject pronoun — **who**, **that**, or **which** — can be reduced to modifying adjective phrases. The adjective clause in (c) cannot be reduced to an adjective phrase.

(e) CLAUSE: The man **who is talking to John** is from Korea.

PHRASE: The man **Ø Ø talking to John** is from Korea.

(f) CLAUSE: The ideas **that are presented in this book** are good.

PHRASE: The ideas **Ø Ø presented in this book** are good.

(g) CLAUSE: Ann is the woman **that is responsible for the error**.

PHRASE: Ann is the woman **Ø Ø responsible for the error**.

There are two ways in which an adjective clause is changed to an adjective phrase.

1. if the adjective clause contains the **be** form of a verb, omit the subject pronoun and the **be** form, as in (e), (f), and (g).\*

(h) CLAUSE: English has an alphabet **that consists of 26 letters**.

PHRASE: English has an alphabet **Ø consisting of 26 letters**.

(i) CLAUSE: Anyone **who wants to come with us** is welcome.

PHRASE: Anyone **Ø wanting to come with us** is welcome.

2. If there is no **be** form of a verb in the adjective clause, it is sometimes possible to omit the subject pronoun and change the verb to its **-ing** form, as in (h) and (i).

(j) **Paris, which is the capital of France**, is an exciting city.

(k) **Paris, the capital of France**, is an exciting city.

If the adjective clause requires commas, as in (j), the adjective phrase also requires commas, as in (k). An adjective phrase in which a noun follows another noun, as in (k), is called an *appositive*.

\*If an adjective clause that contains **be** + a *single adjective* is changed, the adjective is moved to its normal position in front of the noun it modifies.

CLAUSE: **Fruit that is fresh** tastes better than old, soft, mushy fruit.

CORRECT PHRASE: **Fresh fruit** tastes better than old, soft, mushy fruit.

INCORRECT PHRASE: **Fruit fresh** tastes better than old, soft, mushy fruit.

# An Accidental Genius

Jason Padgett was not much of a student. A college dropout, he worked for his father at a furniture store in Tacoma, Washington. He thought of himself as a playboy and didn't think that school was important.

In 2002, at the age of 31, Jason's life changed forever. He left a karaoke bar one night, and while he was walking home, two men attacked him. They knocked him to the ground unconscious. After treatment at a hospital, he went home. The next morning he woke up and noticed that his vision was different. He saw geometric designs in the objects he looked at. Water pouring from a faucet had crystal structures. These were details he had never seen before. He began to draw complex patterns, some taking him weeks to finish. Before his injury, Padgett had never studied beyond pre-algebra. Now he saw mathematical structures everywhere.

He sought the help of a doctor, who told Padgett that he had become a math genius because of the injury. Eventually he went to Finland to meet Dr. Berit Brogaard, a specialist in brain injuries. Dr. Brogaard used a special MRI machine\* to study Padgett's brain and discovered that the part of the brain used for math was more active. The injury had altered his brain to make it very specialized in math.

Padgett went back to school to study advanced math. Sometimes he knew more than his teachers. He also wrote a book, *Struck by Genius*, in which he described the trauma he went through. He said it has changed his life for the better, and he has no regrets.

\*MRI = magnetic resonance imaging; a machine that uses radio waves to take pictures of organs in the body

## EXERCISE 60 ▶ Grammar and writing. (Chapter 13)

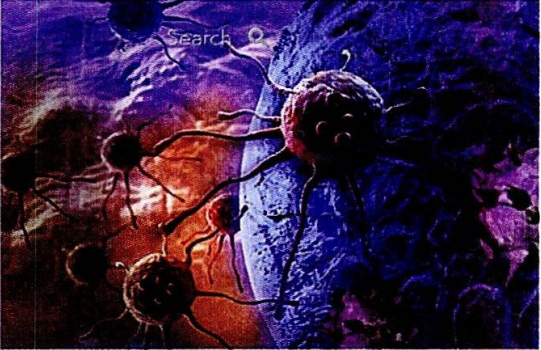

**Part I.** Some writing assignments require extended definition. This type of writing asks you to explain or describe something, for example, a process, a disease, a device, or perhaps something historical. Read the following example. Underline the adjective clauses and phrases.

x

← → C Q ☆ ≡

# What is cancer?

A cancer is a group of cells that divide and grow abnormally. In normal cell activity, new cells divide to replace old or damaged cells. With cancer, the cells grow out of control. Sometimes they spread to other places in the body. At this point, the cancer is malignant and often incurable. A cancer is named after the organ where it began. For example, a cancer beginning in the lungs is called lung cancer.

**Part II.** Depending on your topic, it is helpful to address one or more of the following questions when you write an extended definition. Which question(s) does the paragraph above answer?

- What are the different parts? (e.g., the human heart)
- How does it work? (e.g., a seismograph — a machine to measure earthquakes)
- What happens? (e.g., a process like cell division)
- What does it look like? (e.g., an amoeba)
- What is its purpose? (e.g., a political movement)
- Is it similar to or different from anything? (e.g., a historical event)

**Part III.** Choose something you want to explain or describe. Write an extended definition.

### WRITING TIP

Adjective clauses and phrases are useful because they can add interesting and relevant information to your writing in an efficient way. However, you want to be sure that the information is necessary or adds related information. Because adjective clauses can sound “academic” or very impressive, it may be tempting to use them too often. In the second sentence of the example paragraph, if the writer had written *In cell activity which is normal ...*, the adjective clause is forced. A simple adjective is all that is needed there.

**Part IV.** Edit your writing. Check for the following:

1.  correct pronoun in adjective clauses (*who, which, that, etc.*)
2.  correct use of commas in adjective clauses
3.  if reducing adjective clauses with *be*, delete *be* form and the pronoun
4.  if reducing an adjective clause without *be*, change verb to *-ing* and omit the pronoun
5.  correct spelling (use a dictionary or spell-check)

An *infinitive* = **to** + the simple form of a verb (to see, to be, to go, etc.).

Like gerunds, infinitives can also be used as the subject of a sentence, as in (d), or as the object, as in (e), but it is more common for the infinitive to be used as the object.

\*If possible, native speakers usually prefer to use an infinitive following a progressive verb instead of using two *-ing* verbs in a row.  
Usual: *The baby is starting to walk.* (instead of *walking*)

If the main verb is not progressive, either form is used:  
*Babies start to walk around age one.* OR *Babies start walking around age one.*

\*\*Notice the patterns with **prefer**:

**Prefer + gerund:** *I prefer staying home to going to the concert.*

**Prefer + infinitive:** *I'd prefer to stay home rather than (to) go to the concert.*

 (c) I'm interested *in learning* more about your work.

 (e) I'm *accustomed to sleeping*\* with the window open.  
 (f) I *look forward to going* home next month.

In (d) through (f): **to** is a preposition, not part of an infinitive form, so a gerund follows.

- (g) We *talked about not going* to the meeting, but finally decided we should go.

NEGATIVE FORM: **not** precedes a gerund.

### Common preposition combinations followed by gerunds

be excited** be worried	} <i>about doing it</i>	keep someone prevent someone prohibit someone stop someone	} <i>from doing it</i>	be tired	} <i>of / from doing it</i>

Do you know these words?

- awkward
- loss for words

#### The Awkward Gift

Have you ever received a gift that left you at a loss for words? Perhaps it was an item of clothing a distant aunt chose for you, a souvenir a traveler brought back, or some knick-knack that a friend thought was cute. Moments like these can be a little awkward. But with a few generic comments, you can skillfully cover your discomfort. Here are some responses that can be useful when you open your present:

- Wow, what an interesting design!
- Oh, I've never seen one of these before. Where did you find it?
- It's so colorful. The artist/designer/creator must have spent a lot of time on it.
- It looks so warm/soft/comfortable.

The giver might respond **by saying**, "I'm glad you like it." You can finish the exchange with:

- **Thank you for thinking** of me.
- **Thanks for remembering** it was my birthday (or other special day).
- **I appreciate your\* thinking** of me.
- It was very **kind of you to think** of me.

Speak enthusiastically — with a smile — and you have gracefully accepted the gift.

Complete the conversation. Then practice it and perform it for the class. Remember, you can look at your notes before you speak. When you speak, look at your partner.

By that time, it was only noon!

## EXERCISE 50 ▶ Reading, grammar, and writing. (Chapter 14)

**Part I.** Read the thank-you note written after a job interview. Then read the tips that follow.

Dear Mr. Lopez,

Thank you for giving me the opportunity to interview with you. I enjoyed learning more about your business and having the chance to tell you about my skills and experience. Also, it was interesting to find out that you and my uncle went to school together.

As we discussed, I have an associate's degree in automotive technology and two years of on-the-job experience. Combined with my strong work ethic, I believe this background has prepared me well to be an entry-level mechanic with ABC Automotive.

I am excited to be considered for this position. If you have any further questions, please call or email me. I look forward to hearing from you.

Sincerely,

*Gina DeVries*

Gina DeVries

Although there are various ways to write a thank-you note after a job interview, notice the following important points:

- The writer begins by thanking the interviewer and telling him that she enjoyed the experience.
- In the second paragraph, she restates her skills and experience. She adds that she would be a good person for the specific job.
- In the final paragraph, she expresses enthusiasm for the position. She asks the interviewer to contact her if he has any further questions.
- A common way to end this type of letter is to write *I look forward to hearing from you.*
- *Sincerely*, *Best regards*, or *Kind regards* are polite ways to close.

You might be wondering if the letter should be sent by regular mail or if it can be emailed. It really depends on the culture of the company. For many companies, such as those with a tech or science focus, email is the norm. Also, if the decision is being made quickly, regular mail may be too slow. One rule of thumb is to communicate in the same way as you did previously. If everything has been online, for example, there's a good chance that an email will be preferred.

The thank-you letter is a nice touch. It shows that you are respectful and interested in the position. It may help the interviewer remember you better, especially if you can mention something specific that you talked about. Just be sure that you have someone check it for grammar and spelling! You want to make a good impression.

**Part II.** Write whether a gerund or infinitive follows each item in the sample letter.

1. Thank you for \_\_\_\_\_
2. enjoyed \_\_\_\_\_
3. am excited \_\_\_\_\_
4. look forward to \_\_\_\_\_

2. Write a thank-you letter for the following situation:  
Henry Sanson interviewed with Ms. Azizi for the position of hotel assistant manager.  
He has a recent degree in hotel management and one year's experience as a front desk clerk.

**WRITING TIP**

Thank-you notes, whether for business or otherwise, often have these key phrases:

- *thank you for* + gerund
- *be interested in* + gerund
- *enjoy* + gerund
- *look forward to* + gerund
- *appreciate your taking the time* + infinitive
- *have the opportunity/chance* + infinitive

When you use these words, be sure to check that you have the correct gerund or infinitive form after them.

**Part IV.** Edit your writing. Check for the following:

1.  correct use of gerunds
2.  correct use of infinitives
3.  singular verb when a gerund is the subject
4.  correct preposition if one is required
5.  correct spelling (use a dictionary or spell-check)

## EXERCISE 26 ▶ Reading and speaking. (Chapter 14 and Charts 15-1 → 15-6)

Read the blog entry by author Stacy Hagen and answer the questions.

### BlueBookBlog Multitasking

Doing homework, checking text messages, group chatting — these are common activities, but are we capable of doing all of them at the same time and doing them well? According to research, it is impossible to multitask successfully. We either do the tasks more slowly, or we make mistakes. And with each additional task, the mistakes multiply. We make fewer mistakes with one task, more with two, and even more with three.

Our brain functions better when it stays focused on one task. This is why it is more efficient to do things in batches. We have a particular routine or mindset when we pay bills or answer emails, and these routines are different. So we want to pay all our bills or answer all our emails at one time before we move on to something else.

There is a related technique from organizational psychology that can help us stay on task. It is called “OHIO,” which stands for “only handle it once.” The idea is that once we start a single task like deleting photos from a phone, we should stay with it. We don’t put some photos aside to make decisions about later. The result is that instead of looking at something multiple times, we deal with it only once.

Think about what tasks you have that need to be done for school, work, or at home. Maybe there is something that you have started many times but haven’t ever finished. You might want to give the OHIO technique a try to see how it works for you.

1. What types of activities are you likely to multitask?
2. Is multitasking an effective approach for you?
3. Have you tried to do things in batches in order to be more efficient?
4. Do you have difficulty completing tasks you have started? Do you have any that still need to be finished?
5. Is OHIO a technique that could be helpful to you?

 In (d): Mrs. Lee's son had no choice.

### Causative Have

- (f) I *had* the plumber *repair* the leak.
- (g) Jane *had* the waiter *bring* her some tea.

Causative **have** is followed by the simple form of a verb, not an infinitive.

**INCORRECT:** I had him ~~to~~ repair the leak.  
**Have** gives the idea that "X" **requests** "Y" to do something.  
 In (f): The plumber repaired the leak because I asked him to.

### Causative Get

- (h) The students *got* the teacher *to dismiss* class early.
- (i) Jack *got* his friends *to play* soccer with him after school.

Causative **get** is followed by an infinitive.

**Get** gives the idea that "X" **persuades** "Y" to do something.  
 In (h): The students managed to persuade the teacher to let them leave early.

### Passive Causatives

- (j) I *had* my watch *repaired* (by someone).
- (k) I *got* my watch *repaired* (by someone).

The past participle is used after **have** and **get** to give a passive meaning. In this case, there is usually little or no difference in meaning between **have** and **get**.

In (j) and (k): I caused my watch to be repaired by someone.

### EXERCISE 45 ▶ Reading and writing. (Chapter 15)

**Part I.** Read the passage. Underline the gerunds and infinitives. How many gerunds begin sentences? How many infinitives?

*Do you know these words?*  
 - understatement  
 - remedies  
 - foolproof

#### Why Do Onions Make Us Cry?

Cutting onions is no fun! Most people end up in tears, and the reason is quite simple. Onions contain a gas: sulfur. When an onion is cut, a very fine spray of sulfur is released into the air. It is an understatement to say that our eyes don't enjoy coming into contact with it. They immediately react by trying to wash the sulfur away with tears.

There are a few remedies that may be helpful to you, though not foolproof. Washing an onion with water can help to keep the sulfur away from your eyes. Refrigerating it weakens its strength. Some people find safety goggles effective. You might look foolish when you put them on, but there's a good chance they will keep you from crying. If you enjoy cooking, it's hard to avoid onions, but one of these simple solutions may be of help.

**Part II.** Think about an everyday problem that needs a remedy. Describe the problem and provide one or more solutions. Use one of the suggestions below or choose your own. Be sure to include some gerunds and infinitives.

- stopping the itch in a mosquito bite
- removing a stain from fabric
- removing something sticky from a surface
- soothing a sore throat
- soothing a sunburn

## WRITING TIP

Using a gerund as the subject of a sentence rather than an infinitive is more common. In the passage about onions, *cutting onions* or *washing an onion* is preferable to the infinitive forms: *to cut* or *to wash*.

However, if you want to express the idea of *in order to*, use an infinitive: *To cut an onion, use a sharp knife*. The meaning is “In order to cut an onion, use a sharp knife.”

**Part III.** Edit your writing. Check for the following:

1.  correct use of gerunds with the required verbs
2.  correct use of infinitives with the required verbs
3.  correct use of infinitives with the required adjectives
4.  correct use of a gerund if followed by a preposition
5.  singular verb when a gerund is the subject
6.  correct spelling (use a dictionary or spell-check)

**PRETEST: What do I already know?**

(b) <i>INCORRECT PUNCTUATION:</i> Steve, and Joe are in class.	
(c) Steve, Joe and Rita are in class.	When <i>and</i> connects <b>three or more</b> parts of a parallel structure, a comma is used between the first items in the series. (d) Steve, Joe, and Rita are in class.	
(e) Steve, Joe, Rita, Jan and Kim are in class.	
(f) Steve, Joe, Rita, Jan, and Kim are in class.

\*The purpose of punctuation is to make writing clear for readers. This chart and others in this chapter describe the usual use of commas in parallel structures. Sometimes commas are required according to convention (i.e., the expected use by educated language users). Sometimes use of commas is a stylistic choice made by the experienced writer.

### Ziplining

Ziplining began as a way to get people across impassible places like canyons and crossing rivers. But in the 1980s, Costa Rica, with its emphasis on eco-tourism, turned it into a thrilling adventure. The opportunity to soar over spectacular scenery has made ziplining one of Costa Rica's top tourist attractions.

The concept is very simple, a cable is strung across a scenic area, for example, a lush forest or fast-moving river one end of the cable is higher than the other. A harness for the rider hangs from the cable, riders are strapped tightly into the harness. They climb to a platform, jump off, and flying through the air.

Ziplining's popularity has spread worldwide, the longest zipline is in Sun City, South Africa, where one cable is 1.2 miles (2 km) long. Average speeds are 75 miles (120 km) per hour! Not all zipline rides are as hair-raising, companies around the world strive to provide exciting and safety rides that will appeal to a variety of experience levels and age groups.

### 16-4 Paired Conjunctions: Both ... And; Not Only ... But Also; Either ... Or; Neither ... Nor

(a) <b>Both</b> my mother <b>and</b> my sister <b>are</b> here.	Two subjects connected by <b>both ... and</b> take a plural verb, as in (a).
(b) <b>Not only</b> my mother <b>but also</b> my sister <b>is</b> here. (c) <b>Not only</b> my sister <b>but also</b> my parents <b>are</b> here. (d) <b>Neither</b> my mother <b>nor</b> my sister <b>is</b> here. (e) <b>Neither</b> my sister <b>nor</b> my parents <b>are</b> here.	When two subjects are connected by <b>not only ... but also</b> , <b>either ... or</b> , or <b>neither ... nor</b> , the subject that is closer to the verb determines whether the verb is singular or plural. <b>Not only ... but also</b> is used for emphasis or to indicate surprise. It should be used sparingly.
(f) The research project will take <b>both time and money</b> . (g) Sue saw <b>not only a fox in the woods but also a bear</b> . (h) I'll take <b>either chemistry or physics</b> next quarter. (i) That book is <b>neither interesting nor accurate</b> .	Notice the parallel structure in the examples. The same grammatical form should follow each part of the paired conjunctions.*  In (f): <b>both + noun + and + noun</b> In (g): <b>not only + noun + but also + noun</b> In (h): <b>either + noun + or + noun</b> In (i): <b>neither + adjective + nor + adjective</b>  NOTE: Paired conjunctions are usually used for emphasis; they draw attention to both parts of the parallel structure.

### Cultural Misunderstandings

Since Marco and Anya came to this country, they've had some memorable misunderstandings due to language and culture. The first time Marco met someone at a party, he was asked, "How's it going?" Marco thought that the person was asking him about leaving, and that seemed very strange.

Once, Anya walked into class, and a native speaker said, "Hi. How are you?" When Anya started to give a long answer, the speaker looked at her rather oddly. This happened several times until Anya learned she was just supposed to say something like "OK" or "Fine, thanks. And you?"

Another time, Marco was at a restaurant and wanted to get the server's attention. He snapped his fingers. The server was not pleased.

Since coming here, Marco and Anya have learned that cultural misunderstandings are a normal part of learning another language. They can be valuable and even entertaining learning experiences. Marco and Anya just smile at these misunderstandings now.

<i>because</i>	(a) <i>Because he was sleepy</i> , he went to bed. (b) He went to bed <i>because he was sleepy</i> .	An adverb clause may precede or follow the independent clause. Notice the punctuation in (a) and (b).  Be sure to identify the correct cause and effect. <i>INCORRECT:</i> Because he went to bed, he was sleepy.
<i>now that</i>	(c) <i>Now that I've finished the semester</i> , I'm going to rest a few days and then take a trip. (d) Jack lost his job. <i>Now that he's unemployed</i> , he can't pay his bills.	<i>Now that</i> means "because now." In (c): <i>Now that I've finished the semester</i> means "because the semester is now over."  NOTE: <i>Now that</i> is used with the present, present perfect, or future tenses.
<i>since</i>	(e) <i>Since Monday is a holiday</i> , we don't have to go to work. (f) <i>Since you're a good cook and I'm not</i> , you should cook the dinner.	When <i>since</i> is used to mean "because," it expresses a known cause; it means "because it is a fact that" or "given that it is true that." Cause-and-effect sentences with <i>since</i> say, "Given the fact that X is true, Y is the result." In (e): "Given the fact that Monday is a holiday, we don't have to go to work."
	(g) <i>Since I came here</i> , I have met many people.	NOTE: <i>Since</i> has two meanings. One is "because." It is also used in time clauses, as in (g). See Chart 17-2.

## 17-6 Expressing Conditions in Adverb Clauses: *If*-Clauses

(a) *If it rains tomorrow, I will take my umbrella.*

*If*-clauses (also called “adverb clauses of condition”) present possible conditions. The main clause expresses RESULTS.

In (a): POSSIBLE CONDITION = *it may rain tomorrow*  
RESULT = *I will take my umbrella*

A present tense, not a future tense, is used in an *if*-clause even though the verb in the *if*-clause may refer to a future event or situation, as in (a).\*

### Forms of Address

## Colleges and Universities

It's your first day of class, and you're not sure what to call your teacher. Is the first name acceptable or too informal? If you use a title, should it be *Dr.* or *Professor*?

At the college level, many teachers actually prefer to use first names, because it feels friendlier and less formal. They prefer not to have the psychological distance that a title creates.

While many teachers prefer first names some would rather use titles. *Dr.* is for someone with a Ph.D. degree. It is important to know that not all

instructors have Ph.D.'s. In that case, *Professor* is more appropriate, as long as the teacher has the following job title: *Professor, Associate Professor, or Assistant Professor*. Note that the last name, not first name, is used with *Dr.* and *Professor*.

Even though many graduate students teach college courses. They are not professors. One option for addressing them is *Ms.* or *Mr.* + last name. But most prefer first names, since they are still technically students.

You can always ask your teacher: “What would you like to be called?” or “How would you like to be addressed?” Teachers like to have contact with students, and knowing your teacher's preference may make it easier for you to approach him or her.

When *only if* begins a sentence, the subject and verb of the main clause are inverted, as in (b).<sup>\*</sup> This is a less common usage. No commas are used.

## EXERCISE 42 ▶ Reading, grammar, and writing. (Chapter 17)

**Part I.** Underline the words that introduce adverb clauses. What tense is used in these clauses?

### How Do People Learn Best?

How do people learn best? There is not one answer since much depends on individual learning styles and needs. Over 300 years ago, however, the noted inventor Benjamin Franklin made some observations regarding learning that still hold true for a great many learners today: "Tell me and I forget. Teach me and I remember. Involve me and I learn."

Imagine that you are learning how to fold a paper airplane. Before you ever pick up a piece of paper, the person says the following:

- Take a piece of paper.
- Fold it in half.
- Open the paper.
- Look at the crease in the middle.
- Now take one corner and fold it down along the crease.

All of the information is presented verbally. How well are you going to learn how to fold a paper airplane so long as the instructor continues in this manner?

Now imagine that your instructor is standing before you with paper and gives the directions while she folds the paper herself. Will this help you more?

Finally, imagine that both you and your instructor have paper. Every time she gives you instructions, both you and she fold your own papers.

Of the three methods, which one will be the most effective in helping you learn how to fold a paper airplane?

It's interesting to think about Benjamin Franklin's quote in relation to learning English. How do you learn English best? Is "being told" effective for you? What about "being taught"? How about "being involved"?

**Part II.** Think about your experiences learning English vocabulary and complete the sentences with your own words. Punctuate carefully.

1. I remember new words best when \_\_\_\_\_
2. I often forget the meanings of new words unless \_\_\_\_\_
3. Even if I \_\_\_\_\_  
\_\_\_\_\_
4. I \_\_\_\_\_ only if \_\_\_\_\_
5. If students want to increase their vocabulary, \_\_\_\_\_  
\_\_\_\_\_
6. If teachers want to help their class learn new vocabulary, they \_\_\_\_\_  
\_\_\_\_\_
7. Although \_\_\_\_\_  
\_\_\_\_\_
8. When I am involved in my learning, I feel \_\_\_\_\_  
\_\_\_\_\_

**Part III.** Write one or more paragraphs about how you learn best. Use the questions in the reading and your statements in Part II to help you develop your ideas. You can also include what does not work for you. Organize the points you want to make and support them with examples.

#### WRITING TIP

Remember that adverb clauses do not always need to come at the beginning of a sentence. In fact, it can become boring if the writer always puts them in the same place. Try to vary your writing by changing the position of the adverb clauses, putting some at the beginning and some later in your sentences.

**Part IV.** Edit your writing. Check for the following:

1.  a comma at the end of an adverb clause when it begins a sentence
2.  a period, not a comma, between two complete sentences
3.  correct meaning of adverb clauses
4.  the use of *even though* or *even if* instead of *even*
5.  when *only if* begins a sentence, inversion of the subject and verb in the main clause
6.  placement of adverb clauses: not all at the beginning of sentences
7.  correct spelling (use a dictionary or spell-check)

## EXERCISE 12 ▶ Reading and grammar. (Charts 18-1 → 18-4)

Read the blog entry by author Stacy Hagen. Underline each modifying adverbial phrase and change it to an adverbial clause.

### BlueBookBlog Learning Strategies

There is a lot of interesting research that addresses how students can become more successful learners. In this blog, I'd like to highlight a few strategies for you to think about. While reading them, ask yourself if these strategies would be helpful to you.

- 1. Space your practice:** When deciding whether to cram for a test or spread the review out over several days or weeks, you will benefit more by doing the latter, according to researchers. Cramming is very popular with students, but one problem is that it takes more energy to stay focused as the hours pass by. This energy is better used for learning. More important, cramming uses short-term memory. When you space out the practice over time, you activate your long-term memory and learn the material more deeply.
- 2. Take a test:** Before beginning to learn new material, test your existing knowledge. For example, take a pretest like the one that opens each chapter of this book. You may get all the answers wrong, but interestingly enough, this doesn't matter. Many scientists believe that pretests help prepare the brain to take in new information. One theory is that our thinking somehow adjusts so that we better know what to look for when learning new material.

You can also benefit from self-testing. There are many ways to do this, but here are a few common ones. After reading a passage, try to recall the key points from memory. Or, make your own practice questions to answer. Another helpful technique is to quiz yourself frequently with flashcards that you create. These types of self-quizzing force you to use your long-term memory and help you remember better.

- 3. Handwrite, rather than type, your notes.** A study at Princeton and UCLA found that students who wrote out their lecture notes were better able to understand concepts and retain information than students who used a laptop. When writing out notes in longhand, students have to think more. They can't write every single word, so they have to comprehend and summarize as they write. With typing, it can become more of an automatic task, and all the words can be included without students' really thinking about them.

## EXERCISE 13 ▶ Warm-up. (Chart 18-5)

Which sentences have the same meaning?

1. When Sharon heard the news of her friend's death, she began to cry.
2. Upon hearing the news of her friend's death, Sharon began to cry.

*Upon* can be shortened to *on*.

Examples (a), (b), and (c) all have the same meaning.

### EXERCISE 18 ▶ Reading and grammar. (Chapter 18 Review)

Modifying adverbial phrases are useful when summarizing information. First, read the passage about the invention of the telephone. It has no modifying adverbial phrases. Then read the summary on the next page and underline the modifying adverbial phrases. How do these phrases allow the ideas to be expressed more briefly yet still clearly?

#### The First Telephone

Alexander Graham Bell, a teacher of the deaf in Boston, invented the first telephone. One day in 1875, while he was running a test on his latest attempt to create a machine that could carry voices, he accidentally spilled acid on his coat. Naturally, he called for his assistant, Thomas A. Watson, who was in another room. Bell said, "Mr. Watson, come here. I want you." When he heard words coming from the machine, Watson immediately realized that their experiments had at last been successful. He rushed excitedly into the other room to tell Bell that he had heard his words over the machine.

After he successfully tested the new machine again and again, Bell confidently announced his invention to the world. For the most part, scientists appreciated his accomplishment, but the general public did not understand the revolutionary nature of Bell's invention. Most people believed the telephone was a toy with little practical application, and they paid little attention to Bell's announcement.

## Summary

A small accident helped Alexandar Graham Bell with his invention of the telephone. While running a test to create a machine for voices, Bell spilled acid on his coat. He called to Mr. Watson, his assistant, who was in a different room. Watson heard Bell's words coming out of their new machine. Upon realizing what had happened, Watson and Bell knew that the invention was successful. Bell told the world about his discovery after testing the machine multiple times. Scientists understood the value of his work, but the general public, believing the phone was more of a toy, paid little attention to his announcement.

## EXERCISE 19 ▶ Reading and writing. (Chapter 18)

Part I. Read the passage.

### The QWERTY Keyboard

The letters on an English keyboard have a rather strange placement. If you look at the first row of letters on the keyboard shown, you'll notice that Q-W-E-R-T-Y are the first six letters. At first glance, this design doesn't seem to make a lot of sense, but it turns out there is a logical reason for it.

A man named Christopher Sholes, the inventor of the typewriter, came up with this keyboard in the 1860s. He wanted to create a logical design. Sholes first placed the letters in alphabetical order on his typewriter. He put two rows from A to Z on the keyboard. But Sholes found there was a problem. The letters were on typebars — also called keys — and some of these keys crashed into one another. This happened when letters that often occur together in words, like “s” and “l,” were near each other on the keyboard. The keys hit each other and got stuck, and the typist had to stop and pull them apart.

Sholes tried to figure out a way to keep the keys from hitting one another. He made a list of letters commonly used together in English, like “s” and “l,” or “q” and “u.” He then rearranged these letters so they would be on opposite sides of the keyboard. If you look at a keyboard, “q” is on the left side and “u” is on the right side. He put the keys that were most likely to be hit in succession on opposite sides of the keyboard. This keyboard became known as QWERTY.

When we use computers, we don't have to worry about keys crashing into one another, so QWERTY is not necessarily the fastest and most efficient keyboard. People have come up with alternative keyboard patterns, but so far, none has gained much popularity. Since it has survived since the 1860s, QWERTY has demonstrated its longevity. It does not appear that it is going to be replaced any time soon by a faster, more efficient keyboard.

**Part II.** Write a summary of the passage. You can use the summary in Exercise 17 as a model.\* You may want to work in groups or with a partner first to list the essential information. Include at least three modifying adverbial phrases in your writing.

### WRITING TIP

Good writers avoid wordiness; they edit until they have only the necessary words to express their ideas. The use of modifying adverbial phrases is one way to make writing more concise. Since sentence variety is important, however, it is important not to reduce every possible sentence to a modifying adverbial phrase. A mix of both reduced and non-reduced sentences is more interesting.

**Part III.** Edit your writing. Check for the following:

1.  only essential information in the summary
2.  use of modifying adverbial phrases in some sentences
3.  subjects of the adverb clause and the main clause are the same when modifying adverbial phrases are used
4.  subjects omitted in modifying phrases
5.  a comma used when modifying phrase is first in sentence
6.  correct spelling (use a dictionary or spell-check)

\*See Chapter 10, Exercise 53, p. 214, for more information on how to write a summary.

## 19-1 Introduction

Connectives can express cause/effect, contrast, and condition. They can be adverb-clause words, transitions, conjunctions, or prepositions. In Chapter 17 you studied adverb-clause words to express these ideas. In this chapter you will also look at transitions, conjunctions, and prepositions.

(a) <i>Because</i> Julian felt sick, he left work early. (b) <i>Even though</i> Julian is afraid of doctors, he decided to make an appointment.	The connectives in (a) and (b) are adverb-clause words.
(c) Julian had a rash and fever. <i>Consequently</i> , the doctor ran tests. (d) The doctor ran tests. <i>However</i> , she found nothing serious.	The connectives in (c) and (d) are transitions.
(e) Julian wasn't seriously ill, <i>but</i> his doctor told him to rest anyway. (f) Julian wasn't well, <i>so</i> his doctor told him to rest.	The connectives in (e) and (f) are conjunctions.
(g) <i>Due to</i> his illness, Julian missed several days of work. (h) He stayed home from work <i>because of</i> his illness.	The connectives in (g) and (h) are prepositions.

CAUSE AND EFFECT	because since now that	so (that) therefore consequently	so	because of due to
CONTRAST	even though although though	while however nevertheless nonetheless on the other hand	but (... anyway) yet (... still)	despite in spite of
CONDITION	if unless only if even if whether or not	in case otherwise	or (else)

They are used most commonly in formal written English and rarely in spoken English.</p>
<p>(d) Al didn't study. <i>Therefore</i>, he failed the test.                  (e) Al didn't study. He, <i>therefore</i>, failed the test.                  (f) Al didn't study. ## 19-4 Summary of Patterns and Punctuation

ADVERB CLAUSES	(a) <i>Because it was hot,</i> we went swimming. (b) We went swimming <i>because it was hot.</i>	An <i>adverb clause</i> may precede or follow an independent clause.  PUNCTUATION: A comma is used if the adverb clause comes first.
PREPOSITIONS	(c) <i>Because of the hot weather,</i> we went swimming. (d) We went swimming <i>because of the hot weather.</i>	A <i>preposition</i> is followed by a noun object, not by a subject and verb.  PUNCTUATION: A comma is usually used if the prepositional phrase precedes the subject and verb of the independent clause.
TRANSITIONS	(e) It was hot. <i>Therefore,</i> we went swimming. (f) It was hot. <i>We, therefore,</i> went swimming. (g) It was hot. <i>We went swimming, therefore.</i> (h) It was hot; <i>therefore,</i> we went swimming.	A <i>transition</i> is used with the second sentence of a pair. It shows the relationship of the second idea to the first idea. A transition is movable within the second sentence.  PUNCTUATION: A semicolon (;) may be used in place of a period, as in (h).  NOTE: A period is used between the two independent clauses in (e)–(g); a comma is not possible. Commas are usually used to set the transition off from the rest of the sentence.
CONJUNCTIONS	(i) It was hot, <i>so</i> we went swimming	A conjunction comes between two independent clauses.  PUNCTUATION: Usually a comma is used immediately in front of a conjunction.

\* In general, a semicolon can be used instead of a period between any two sentences that are closely related in meaning: *Peanuts are not nuts; they are beans.* Notice that a small letter, NOT a capital letter, immediately follows a semicolon.

Kay got a new job so that ...

1. \_\_\_\_\_ she could be closer to home.
2. \_\_\_\_\_ she is very excited.
3. \_\_\_\_\_ her husband is taking her out to dinner to celebrate.
4. \_\_\_\_\_ she could earn more money.

### 19-6 Expressing Purpose: Using So That

(a) I turned off the TV *in order to enable my roommate to study in peace and quiet.*

(b) I turned off the TV *so (that) my roommate could study in peace and quiet.*

*In order to* expresses *purpose*. (See Chart 15-1, p. 335.)

In (a): I turned off the TV for a purpose. The purpose was to make it possible for my roommate to study in peace and quiet. Examples (a) and (b) have the same meaning.

#### So That + Can or Could

(c) I'm going to cash a check *so that I can buy my textbooks.*

(d) I cashed a check *so that I could buy my textbooks.*

*So that* also expresses *purpose*.\* It expresses the same meaning as *in order to*. The word *that* is often omitted, especially in speaking.

*So that* is often used instead of *in order to* when the idea of ability is being expressed. **Can** is used in the adverb clause for a present/future meaning.

In (c): *so that I can buy* = *in order to be able to buy*

**Could** is used after *so that* in past sentences, as in (d).\*\*

#### So That + Will / Would or Simple Present

(e) I'll take my umbrella *so that I won't get wet.*

(f) Yesterday I took my umbrella *so that I wouldn't get wet.*

(g) I'll take my umbrella *so that I don't get wet.*

In (e): *so that I won't get wet* = *in order to make sure that I won't get wet*

**Would** is used in past sentences, as in (f).

In (g): It is sometimes possible to use the simple present after *so that* in place of **will**; the simple present expresses a future meaning.

\*NOTE: *In order that* has the same meaning as *so that* but is less commonly used.

Example: *I turned off the TV in order that my roommate could study in peace and quiet.*

Both *so that* and *in order that* introduce adverb clauses. It is unusual but possible to put these adverb clauses at the beginning of a sentence: **So that my roommate could study in peace and quiet, I turned off the TV.**

\*\*Also possible but less common: the use of **may** or **might** in place of **can** or **could** (e.g., *I cashed a check so that I might buy my textbooks.*).

## EXERCISE 21 ► Looking at grammar. (Chart 19-6)

5. Despite having a broken arm, Rick didn't go to the doctor.		
6. Jeff broke his arm; therefore, he went to the doctor.		

### 19-7 Showing Contrast (Unexpected Result)

All of these sentences have the same meaning. The idea of cold weather is contrasted with the idea of going swimming. Usually if the weather is cold, one does not go swimming, so going swimming in cold weather is an "unexpected result." It is surprising that the speaker went swimming in cold weather.

ADVERB CLAUSES	<i>even though</i> <i>although</i> <i>though</i>	(a) <i>Even though it was cold</i> , I went swimming. (b) <i>Although it was cold</i> , I went swimming. (c) <i>Though it was cold</i> , I went swimming.*
CONJUNCTIONS	<i>but ... anyway</i> <i>but ... still</i> <i>yet ... still</i>	(d) It was cold, <i>but</i> I went swimming ( <i>anyway</i> ). (e) It was cold, <i>but</i> I ( <i>still</i> ) went swimming. (f) It was cold, <i>yet</i> I ( <i>still</i> ) went swimming.
TRANSITIONS	<i>nevertheless</i> <i>nonetheless</i> <i>however ... still</i>	(g) It was cold. <i>Nevertheless</i> , I went swimming. (h) It was cold; <i>nonetheless</i> , I went swimming. (i) It was cold. <i>However</i> , I ( <i>still</i> ) went swimming.
PREPOSITIONS	<i>despite</i> <i>in spite of</i> <i>despite the fact that</i> <i>in spite of the fact that</i>	(j) I went swimming <i>despite</i> the cold weather. (k) I went swimming <i>in spite of</i> the cold weather. (l) I went swimming <i>despite the fact that</i> the weather was cold. (m) I went swimming <i>in spite of the fact that</i> the weather was cold.

\* Another way to show contrast is to put *though* at the end of the sentence: *It was cold. I went swimming, though.* The meaning is similar to *but* (e.g., *It was cold, but I went swimming.*); however, *though* is softer. This usage is very common in spoken English.

All of the sentences have the same meaning: “This” is the opposite of “that.”		
ADVERB CLAUSES	<i>while</i>	(a) Mary is rich, <i>while</i> John is poor.* (b) John is poor, <i>while</i> Mary is rich.
CONJUNCTIONS	<i>but</i>	(c) Mary is rich, <i>but</i> John is poor. (d) John is poor, <i>but</i> Mary is rich.
TRANSITIONS	<i>however</i>	(e) <del>Mary</del> is rich; <i>however</i> , John is poor. (f) John is poor; <i>Mary is rich, however</i> .
	<i>on the other hand</i>	(g) Mary is rich. <i>John, on the other hand, is poor.</i> (h) John is poor. <i>Mary, on the other hand, is rich.</i>

\*Sometimes a comma precedes a *while*-clause that shows direct contrast. A comma helps clarify that *while* is being used to express contrast rather than time. The use of a comma in this instance is a stylistic choice by the writer.

**Why We Yawn**

Have you ever noticed that when a person near you yawns, you may start yawning too? This is called contagious yawning. *Contagious* in this sense means that the behavior spreads: in the case of yawning, when one person yawns, it can cause others to do the same thing.

There are various theories about why people yawn. One popular idea is that yawning brings more oxygen into the brain \_\_\_\_\_ people will wake up. Is that what you have thought? \_\_\_\_\_, in 2007, researchers at a university in New York came up with a new idea: yawning helps cool the brain. When people's brains are warm, they yawn more frequently; yawning brings cooler air into the body and, \_\_\_\_\_, cools the brain. This is important because cooler brains work better than warmer ones.

This may also help explain why yawning is contagious. People are more awake when their brains are cooler; \_\_\_\_\_, contagious yawning helps people be more alert. As people evolved, this was important in times of danger. \_\_\_\_\_ they yawned, they could have been signaling to others to stay awake.

\_\_\_\_\_ it can be annoying to have a person yawn when you are talking, perhaps you can tell yourself that he or she actually wants to stay awake, not go to sleep.

## EXERCISE 41 ▶ Reading, grammar, and writing. (Chapter 19)

**Part I.** Read the passage comparing optimists and pessimists.

### Optimists vs. Pessimists

How do you see the glass in the picture? Is it half empty or half full? People who say it is half empty are called pessimists, while people who say it is half full are called optimists. In simple terms, optimists see the best in the world, while pessimists see the worst.

One of the clearest ways to see the differences between the two is to look at the way optimists and pessimists explain events. When something bad happens, optimists tend to see the event as a single occurrence that does not affect other areas of their lives.

For example, Sarah is an optimistic person. When she gets a low grade on a test, she will say something like this to herself: “Oh well, that was one test I didn’t do well on. I wasn’t feeling well that day. I have another test in a few weeks. I’ll do better on that one.”

Pessimists, on the other hand, will feel that an event is just one of a string of bad events that affects their lives, and somehow they are the cause of it. Let’s take a look at Susan. She is a pessimist. When she gets a low grade on a test, she might say: “I failed again. I never do well on tests. I’m stupid. Why even try?” And when something does go well for Susan, she may say: “I was just lucky that time.” She doesn’t expect to do well again. While optimists don’t see themselves as failures, pessimists do.

Research has shown that optimism can be a learned trait and that, despite their upbringing, people can train themselves to respond to events in more positive terms. For example, Paul has a tendency to react negatively to events. The first thing he has to do is become conscious of that behavior. Once he identifies his reaction, he can reframe his thoughts in more positive terms, as Sarah did when she failed the test. As Paul begins to do more of this, he forms new patterns of responses, and over time these responses become more automatic. Gradually he can develop a more positive outlook on life.

**Part II.** Complete the sentences with information from the passage.

1. Optimists think positively about life, while ...
2. An optimist may do poorly on a test; nevertheless, ...
3. Things sometimes go well for a pessimist; however, ...
4. Pessimists see themselves as failures; on the other hand, ...
5. Optimists see the best in the world; therefore, ...
6. Optimists see the best in the world; however, ...
7. Although people may have been raised as pessimists, ...
8. Optimism can be a learned trait; consequently, ...
9. If a pessimist wants to change how he reacts, ...

**Part III.** Are you an optimist, a pessimist, or a combination of both? Write about your personality, and provide some specific examples that support your ideas. Use connecting words from this chapter.

### WRITING TIP

Reread the passage “Optimists vs. Pessimists.” Note that there is a variety of longer and shorter sentences.

It is important to remember to vary your own sentence style to make your writing more interesting. Good writers use a combination of shorter and longer, more complex sentences. For example, you can use a transition word with a period to create a shorter sentence, but a semicolon to create a longer one.

While it is desirable to use sentence connectors, make sure that not all of your sentences become long and elaborate. Too many connecting words can make your writing seem repetitious. And remember that not all sentences need connecting words!

**Part IV.** Edit your writing. Check for the following:

1.  a period, not a comma, between two complete sentences
2.  correct meanings of transition words
3.  correct use of adjective and nouns with **so** and **such**:  
    **so** + *adjective* + **that**  
    **such** + *noun* + **that**
4.  use of nouns after **because of** and **due to**
5.  use of nouns after **despite** and **in spite of**
6.  correct punctuation (period or semicolon) with transition words
7.  sentence variety by using a combination of shorter and longer sentences
8.  correct spelling (use a dictionary or spell-check)

## 20-1 Overview of Basic Verb Forms Used in Conditional Sentences

Conditional sentences express the idea of *if ... , then ...* . These sentences can talk about real situations — facts, regularly occurring events, etc. — and unreal situations — imaginary or impossible ones.

Situation	If-Clause	Result Clause	Examples
REAL IN THE PRESENT REAL IN THE FUTURE	<b>simple present</b>	<i>simple form of the verb</i>  <i>will + simple form</i>	If I <b>have</b> enough time, I <b>watch</b> TV every evening. If I <b>have</b> enough time, I <b>will watch</b> TV later on tonight.
UNREAL IN THE PRESENT / FUTURE	<b>simple past</b>	<i>would + simple form</i>	If I <b>had</b> enough time, I <b>would watch</b> TV now or later on.
UNREAL IN THE PAST	<b>past perfect</b>	<i>would have + past participle</i>	If I <b>had had</b> enough time, I <b>would have watched</b> TV yesterday.

A result-clause verb can be:</p> <ul style="list-style-type: none"> <li>• the <i>simple present</i>, to express a habitual activity or situation, as in (a).</li> <li>• the <i>simple future</i>, to express a particular activity or situation in the future, as in (b).</li> <li>• the <i>simple present</i> or the <i>simple future</i>, to express an established, predictable fact or general truth, as in (c) and (d).</li> </ul>

#### Why Did Dinosaurs Become Extinct?

There are several scientific theories as to why dinosaurs became extinct. One theory has to do with asteroids. Asteroids are rocky objects that orbit the sun. **EXERCISE 46 ▶ Reading and grammar. (Charts 20-1 → 20-9)**

**Part I.** Read the blog entry by author Stacy Hagen.

Do you know these words?

- wander
- brain scan
- nap
- pop into

**BlueBookBlog** **Becoming “Unstuck”**

If you were trying to write a research paper for a class and couldn't come up with any ideas, what would you do? Would you keep working away or would you stop for a while? Interestingly, research points to stopping so that your mind can wander. Instead of continuing to focus on a task, the best thing to do is to leave the task for a while and do something else that frees up your thinking.

Surprisingly, if we stop concentrating on something, we actually become more creative. Researchers have found by looking at brain scans that our minds are very active during the daydreaming stage. By not focusing on a problem, we are able to look at it in new ways when we come back to it. As our minds wander, they often find the solution.

The company 3M has known this for decades. Since 1948, they have had the 15% rule: 15% of employees' time can be spent on a hobby or project of their choice. On top of that, they are encouraged to take walks, breaks, naps — whatever their minds need to help unlock their creativity.

A Stanford University study found that walking outdoors increased creativity by an average of 60%. I decided to give this a try and was amazed at how quickly I became “unstuck.” Possibilities and answers really did pop into my head. To be honest, I was surprised at how effective this was. And, it's not just walking that has helped. Sometimes all I need to do is leave my computer and start another task that lets me daydream — something as simple as getting a snack.

I wish I had known this during my college days. I'm sure it would have helped me be a more efficient and productive student. I certainly know I would have been calmer and more relaxed when I got stuck.

**Part II.** Identify the time frame of the ideas in the phrases (*now* or *past*). Decide if they express real or unreal conditions.

	NOW/PAST	REAL/UNREAL
1. If you were trying to write a research paper for a class and couldn't come up with any ideas, ...	<u>now</u>	<u>unreal</u>

4. If we stop concentrating on something, ...	_____	_____
5. It would have helped me ...	_____	_____
6. I would have been calmer and more relaxed ...	_____	_____

**Part III.** Think about challenges you have when you do homework. What slows you down? Do you ever get stuck? What helps you get unstuck? Would the techniques in this blog work for you if you tried them? Why or why not? Discuss the questions with a partner or in small groups.

## EXERCISE 53 ▶ Reading and writing. (Chapter 20)

**Part I.** Read the passage. Which words are used to introduce hypothetical situations? Underline them.

Do you know these words?  
- appealing      - throbbing  
- agonizing      - untold  
- suffering      - outcomes

### A Life Without Pain

Can you imagine a world where people felt no pain? At first it sounds appealing. You wouldn't know the agonizing suffering that comes from pain. If you had a throbbing headache or toothache, you wouldn't even feel it. But you also wouldn't know to check if the headache or toothache indicated something more serious. Or if you had a different condition, like a broken bone, you wouldn't necessarily know that it needed to be treated.

Some people are born with an inability to feel pain. However, rather than being a positive condition, it causes untold problems. If people can't feel pain, they don't know if they are hurt. For parents of young children, this is a nightmare. How would a child know about the dangers of a hot stove or broken glass? A burn wouldn't be painful and a cut wouldn't hurt.

Parents of these children have to continually watch for injuries. Normal activities like going to the playground aren't at all normal. Suppose a child fell from the top of a slide. He or she might find this fun and try to do it again, risking further injury.

Pain turns out to be lifesaving; it helps us to know if something is wrong and requires treatment. Without it, we would go through life hurting ourselves, possibly with deadly outcomes.

## WRITING TIP

As you have learned, sentence variety (changing the length and structure of your sentences) makes your writing more interesting. Remember that always using *if* to express hypothetical situations can become repetitious. As you saw in the reading passage, there are other words and expressions you can use to introduce hypothetical situations: *without, suppose, imagine, how would*.

Or, as you have learned in Chart 20-7, you can sometimes omit *if* and invert the subject and verb.

**Part II.** Look at the following topics. Brainstorm ideas with your classmates. Then choose one and write about it. Use conditionals in your writing.

*What would life be like without ...*

- a sense of smell?
- the need for sleep?
- the sun?
- trees?
- schools/education?
- the Internet?
- a cell phone?
- social media?

**Part III.** Edit your writing. Check for the following:

1.  use of conditional sentences
2.  use of correct verbs with conditional sentences
3.  sentence variety by not always using *if*
4.  correct spelling (use a dictionary or spell-check)

### UNIT A: Basic Grammar Terminology

#### A-1 Subjects, Verbs, and Objects

(a)  $\begin{matrix} \text{S} & \text{V} \\ \text{Birds} & \text{fly.} \\ \text{(noun)} & \text{(verb)} \end{matrix}$

(b)  $\begin{matrix} \text{S} & \text{V} \\ \text{The baby} & \text{cried.} \\ \text{(noun)} & \text{(verb)} \end{matrix}$

(c)  $\begin{matrix} \text{S} & \text{V} & \text{O} \\ \text{The student} & \text{needs} & \text{a pen.} \\ \text{(noun)} & \text{(verb)} & \text{(noun)} \end{matrix}$

(d)  $\begin{matrix} \text{S} & \text{V} & \text{O} \\ \text{My friend} & \text{enjoyed} & \text{the party.} \\ \text{(noun)} & \text{(verb)} & \text{(noun)} \end{matrix}$

Almost all English sentences contain a subject (**S**) and a verb (**V**). The verb may or may not be followed by an object (**O**).

**VERBS:** Verbs that are not followed by an object, as in (a) and (b), are called “intransitive verbs.”

Common intransitive verbs: *agree, arrive, come, cry, exist, go, happen, live, occur, rain, rise, sleep, stay.*

Verbs that are followed by an object, as in (c) and (d), are called “transitive verbs.”

Common transitive verbs: *build, cut, find, like, make, need, send, use, want.*

Some verbs can be either intransitive or transitive.

Intransitive: *A student studies.*

Transitive: *A student studies books.*

**SUBJECTS AND OBJECTS:** The subjects and objects of verbs are nouns (or pronouns).

Examples of nouns: *person, place, thing, John, Asia, pen, information, appearance, amusement.*

#### A-2 Adjectives

(a) Ann is an *intelligent* student.  
(adjective) (noun)

(b) The *hungry* child ate fruit.  
(adjective) (noun)

(c) I saw some *beautiful* pictures.  
*INCORRECT:* beautiful ~~s~~ pictures

Adjectives describe nouns. In grammar, we say that adjectives modify nouns.

The word *modify* means “change a little.” Adjectives give a little different meaning to a noun: *intelligent student, lazy student, good student.*

Examples of adjectives: *young, old, rich, beautiful, brown, French, modern.*

An adjective is neither singular nor plural. A final *-s* is never added to an adjective.

## A-3 Adverbs

(a) He walks <b>quickly</b> . (adverb)	Adverbs modify verbs. Often they answer the question "How?" In (a): <i>How does he walk?</i> Answer: <i>Quickly</i> .

(c) I am <b>extremely</b> happy. (adverb) (adjective)	Adverbs are also used to modify adjectives, i.e., to give information about adjectives, as in (c).				
(d) Ann will come <b>tomorrow</b> . (adverb)	Adverbs are also used to express time or frequency. Examples: <i>tomorrow, today, yesterday, soon, never, usually, always, yet</i> .				
MIDSENTENCE ADVERBS: (e) Ann <b>always</b> comes on time. (f) Ann <i>is</i> <b>always</b> on time. (g) Ann <i>has</i> <b>always</b> come on time. (h) Does <i>she</i> <b>always</b> come on time?	Some adverbs may occur in the middle of a sentence. Midsentence adverbs have usual positions; they <ul style="list-style-type: none"> <li>• come in front of simple present and simple past verbs (except <b>be</b>), as in (e);</li> <li>• follow <b>be</b> (simple present and simple past), as in (f);</li> <li>• come between a helping verb and a main verb, as in (g).</li> </ul> In a question, a midsentence adverb comes directly after the subject, as in (h).				
<b>Common midsentence adverbs</b>					
ever	usually	generally	seldom	never	already
always	often	sometimes	rarely	not ever	finally
	frequently	occasionally	hardly ever		just

# UNIT B: Questions

## B-1 Forms of Yes / No and Information Questions

A **yes/no question** = a question that may be answered by *yes* or *no*

A: Does he live in Chicago?

B: Yes, he does. OR No, he doesn't.

An **information question** = a question that asks for information by using a question word

A: Where does he live?

B: In Chicago.

Question word order = (Question word) + helping verb + subject + main verb

Notice that the same subject-verb order is used in both *yes/no* and information questions.

(Question Word)	Helping Verb	Subject	Main Verb	(Rest of Sentence)	
(a)	<b>Does</b>	<i>she</i>	<b>live</b>	there?	If the verb is in the simple present, use <b>does</b> (with <i>he, she, it</i> ) or <b>do</b> (with <i>I, you, we, they</i> ) in the question. If the verb is simple past, use <b>did</b> .  Notice: The main verb in the question is in its simple form; there is no final <b>-s</b> or <b>-ed</b> .
(b) Where	<b>does</b>	<i>she</i>	<b>live?</b>	there?	
(c)	<b>Do</b>	<i>they</i>	<b>live</b>	there?

(g)	<b>Is</b>	<i>he</i>	<b>living</b>	there?	If the verb has an auxiliary (a helping verb), the same auxiliary is used in the question. There is no change in the form of the main verb.  If the verb has more than one auxiliary, only the first auxiliary precedes the subject, as in (m) and (n).
(h) Where	<b>is</b>	<i>he</i>	<b>living?</b>	there?	
(i)	<b>Have</b>	<i>they</i>	<b>lived</b>	there?

(l) Where	<b>can</b>	<i>Mary</i>	<b>live?</b>	there?	
(m)	<b>Will</b>	<i>he</i>	<b>be living</b>	there?	If the question word is the subject, usual question-word order is not used; <b>does</b> , <b>do</b> , and <b>did</b> are not used. The verb is in the same form in a question as it is in a statement.  Statement: <i>Tom came.</i> Question: <i>Who came?</i>
(n) Where	<b>will</b>	<i>he</i>	<b>be living?</b>	there?	
(o) Who	∅	∅	<b>lives</b>	there?

(q)	<b>Are</b>	<i>they</i>	∅	there?

(s)	<b>Was</b>	<i>Jim</i>	∅	there?	Main verb <b>be</b> in the simple present ( <i>am, is, are</i> ) and simple past ( <i>was, were</i> ) precedes the subject. It has the same position as a helping verb.

In a *yes/no* question in which the verb is negative, usually a contraction (e.g., *does + not = doesn't*) is used, as in (a).

Example (b) is very formal and is usually not used in everyday speech.

Negative questions are used to indicate the speaker's idea (i.e., what she/he believes is or is not true) or attitude (e.g., surprise, shock, annoyance, anger).

- (c) Bob returns to his dorm room after his nine o'clock class. Matt, his roommate, is there. Bob is surprised.

 The tag pronoun for **these / those** = **they**.

- (d) **There is** a meeting tonight, **isn't there**?

In sentences with **there + be**, **there** is used in the tag.

- (e) **Everything** is OK, **isn't it**?  
 (f) **Everyone** took the test, **didn't they**?

Personal pronouns are used to refer to indefinite pronouns. **They** is usually used in a tag to refer to **everyone, everybody, someone, somebody, no one, nobody**.

- (g) **Nothing is** wrong, **is** it?  
 (h) **Nobody called** on the phone, **did** they?  
 (i) You've **never been** there, **have** you?

Sentences with negative words take affirmative tags.

- (j) **I am** supposed to be here, **am I not**?  
 (k) **I am** supposed to be here, **aren't I**?

In (j): **am I not?** is formal English.  
 In (k): **aren't I?** is common in spoken English.

\*A tag question may be spoken:

- (1) with a rising intonation if the speaker is truly seeking to ascertain that his/her information, idea, belief is correct (e.g., *Ann lives in an apartment, doesn't she?*); OR
- (2) with a falling intonation if the speaker is expressing an idea with which she/he is almost certain the listener will agree (e.g., *It's a nice day today, isn't it?*).

Jim **could** use some help, **couldn't** he?

# UNIT C: Contractions

## C Contractions

**IN SPEAKING:** In everyday spoken English, certain forms of **be** and auxiliary verbs are usually contracted with pronouns, nouns, and question words.

**IN WRITING:** (1) In written English, contractions with pronouns are common in informal writing, but they're not generally acceptable in formal writing.

(2) Contractions with nouns and question words are, for the most part, rarely used in writing. A few of these contractions may be found in quoted dialogue in stories or in very informal writing, such as a chatty letter to a good friend, but most of them are rarely if ever written.

In the following, quotation marks indicate that the contraction is frequently spoken but rarely, if ever, written.

	With Pronouns	With Nouns	With Question Words
<i>am</i>	<i>I'm</i> reading a book.	∅	" <i>What'm</i> " I supposed to do?
<i>is</i>	<i>She's</i> studying. <i>It's</i> going to rain.	My " <i>book's</i> " on the table. <i>Mary's</i> at home.	<i>Where's</i> Sally? <i>Who's</i> that man?
<i>are</i>	<i>You're</i> working hard. <i>They're</i> waiting for us.	My " <i>books're</i> " on the table. The " <i>teachers're</i> " at a meeting.	" <i>What're</i> " you doing? " <i>Where're</i> " they going?
<i>has</i>	<i>She's</i> been here for a year. <i>It's</i> been cold lately.	My " <i>book's</i> " been stolen! <i>Sally's</i> never met him.	<i>Where's</i> Sally been living? <i>What's</i> been going on?
<i>have</i>	<i>I've</i> finished my work. <i>They've</i> never met you.	The " <i>books've</i> " been sold. The " <i>students've</i> " finished the test.	" <i>Where've</i> " they been? " <i>How've</i> " you been?
<i>had</i>	<i>He'd</i> been waiting for us. <i>We'd</i> forgotten about it.	The " <i>books'd</i> " been sold. " <i>Mary'd</i> " never met him before.	" <i>Where'd</i> " you been before that? " <i>Who'd</i> " been there before you?
<i>did</i>	∅	∅	" <i>What'd</i> " you do last night? " <i>How'd</i> " you do on the test?
<i>will</i>	<i>I'll</i> come later. <i>She'll</i> help us.	The " <i>weather'll</i> " be nice tomorrow. " <i>John'll</i> " be coming soon.	" <i>Who'll</i> " be at the meeting? " <i>Where'll</i> " you be at ten?
<i>would</i>	<i>He'd</i> like to go there. <i>They'd</i> come if they could.	My " <i>friends'd</i> " come if they could. " <i>Mary'd</i> " like to go there too.	" <i>Where'd</i> " you like to go?

# UNIT D: Negatives

## D-1 Using Not and Other Negative Words

- (a) AFFIRMATIVE: The earth is round.  
 (b) NEGATIVE: The earth is **not** flat.

**Not** expresses a *negative* idea.

	AUX	+	NOT	+	MAIN VERB	
(c) I	<b>will</b>		<b>not</b>		<b>go</b>	there.
I	<b>have</b>		<b>not</b>		<b>gone</b>	there.
I	<b>am</b>		<b>not</b>		<b>going</b>	there.
I	<b>was</b>		<b>not</b>			there.
I	<b>do</b>		<b>not</b>		<b>go</b>	there.
He	<b>does</b>		<b>not</b>		<b>go</b>	there.
I	<b>did</b>		<b>not</b>		<b>go</b>	there.

**Not** immediately follows an auxiliary verb or **be**.

NOTE: If there is more than one auxiliary, **not** comes immediately after the first auxiliary: **I will not be going there.**

**Do** or **does** is used with **not** to make a simple present verb (except **be**) negative.

**Did** is used with **not** to make a simple past verb (except **be**) negative.

### Contractions of auxiliary verbs with **not**

are not = aren't\*  
 cannot = can't  
 could not = couldn't  
 did not = didn't  
 does not = doesn't  
 do not = don't

has not = hasn't  
 have not = haven't  
 had not = hadn't  
 is not = isn't  
 must not = mustn't  
 should not = shouldn't

was not = wasn't  
 were not = weren't  
 will not = won't  
 would not = wouldn't

- (d) I almost **never** go there.  
 I have **hardly ever** gone there.

In addition to **not**, the following are negative adverbs:  
*never, rarely, seldom  
 hardly (ever), scarcely (ever), barely (ever)*

- (e) There's **no** chalk in the drawer.

**No** also expresses a negative idea.

COMPARE: **NOT** VS. **NO**

- (f) I **do not have** any money.  
 (g) I have **no money**.

**Not** is used to make a verb negative, as in (f).

**No** is used as an adjective in front of a noun (e.g., money), as in (g).

NOTE: Examples (f) and (g) have the same meaning.

\*Sometimes in spoken English you will hear "ain't." It means "am not," "isn't," or "aren't." *Ain't* is not considered proper English although it is frequently used for humor.

## D-2 Avoiding Double Negatives

- (a) **INCORRECT:** I ~~don't~~ have ~~no~~ money.  
 (b) **CORRECT:** I **don't** have **any** money.  
**CORRECT:** I have **no** money.

Sentence (a) is an example of a "double negative," i.e., a confusing and grammatically incorrect sentence that contains two negatives in the same clause. One clause should contain only one negative.\*

\*Negatives in two different clauses in the same sentence cause no problems; for example:

*A person who **doesn't** have love **can't** be truly happy.  
 I **don't** know why he **isn't** here.*

## D-3 Beginning a Sentence with a Negative Word

- (a) **Never will I do** that again!  
 (b) **Rarely have I eaten** better food.  
 (c) **Hardly ever does he come** to class on time.

When a negative word begins a sentence, the subject and verb are inverted (i.e., question word order is used).\*

\*Beginning a sentence with a negative word is relatively uncommon in everyday usage; it is used when the speaker/writer wishes to emphasize the negative element of the sentence and be expressive.

I had a terrible experience last night. You won't believe what happened! A man burst into my apartment while I was asleep. There I was, just sleeping peacefully, when someone broke the glass in the sliding door!

The sound woke me up. I heard the sliding door open, so I reached for the phone by the bed and called the police. My voice shook as I told the operator there was an intruder in my home.

I hid in my bedroom closet when the burglar came into my room. Soon I heard sirens as the police sped to my building. From the crack in the closet door, I saw the burglar as he ran outside with my laptop.

The police jumped out of their cars and followed him, but he managed to get away in a car that was waiting for him. The police got back in their cars and drove after him. Later I learned that they caught him a few miles from my building.

I quickly apologized and went to my own. I felt very stupid about what I had done.

## Chapter 5

### Exercise 8, p. 82.

#### *Thrill Seekers*

Going over a waterfall in a kayak is not everyone's idea of a good time. But for some people, the experience of somersaulting through a curtain of water is thrilling, and they want to keep doing it. It has in part to do with adrenaline. The body releases a large amount of this hormone in response to danger. For some people, this release produces very pleasant feelings, and they seek out activities that will give them this feeling. The experience of parachuting from a mountain, for example, is exhilarating, not terrifying, for them. Researchers are studying reasons why some people enjoy this adrenaline rush and others fear it.

### Exercise 17, p. 86.

8. If you're thirsty, there's juice in the fridge.

### Exercise 18, p. 87.

#### *What's the difference?*

1. *Rain vs. Showers*  
Many people treat these words as having the same meaning. For people who follow the weather, however, there is a difference. Rain is steady and covers a larger area. Showers tend to be more scattered and do not last as long. There is an easy way to remember the difference: think about taking a bath vs. taking a shower. Most of us get wetter when we take a bath than when we stand in the shower.  
Now, which expression do you think is correct: *It's raining out* or *It's showering out*? If you chose the first one, you are right. We use only *rain*, not *shower*, as a verb to talk about the weather.
2. *Thief vs. Robber vs. Burglar*  
Another set of words with distinct differences is *thief*, *robber*, and *burglar*. A thief takes physical property like TVs, computers, or money, but there is no violence or force. Robbers also take property, but the robber uses force or the threat of force, as with a gun. A burglar illegally enters a structure with the intent to commit a crime.  
If some of this seems confusing, you are in good company. Many native speakers of English have never learned these subtleties and don't make distinctions among these words.

### Exercise 31, p. 109.

#### *Hoarding*

Rebecca has a problem. She doesn't have any visitors. Her family doesn't come to see her anymore. It's not because they don't like her. It's because no one can get through her front door. There is too much stuff blocking the way. Rebecca is a hoarder.

Hoarders are unable to throw out or give away things they no longer need such as newspapers, magazines, clothes, and furniture. Some hoarders have boxes that reach the ceiling.

Hoarding has just recently come to the attention of the general public. Hoarding is more than having a messy or cluttered home. Hoarding interferes with a person's

ability to function. Occasionally, hoarding can become life-threatening. In one situation, the floor of a hoarder's house collapsed. Sometimes garbage builds up in the house and health problems arise.

Scientists believe that an area in the brain affects a person's ability to make decisions to get rid of things. Researchers are working on treatments for this condition.

A: But it's really good. Do you want to try a little? Maybe you'd drink more coffee this way.  
B: Uh, I don't think so! I have very little sugar in my diet. It makes me hyper.

### Exercise 26, p. 133.

#### *Computer Bugs*

When there is a problem with a computer, we often say we have a "computer bug." Of course, it's not a real insect. It refers to a technical difficulty we are having. The expression actually goes back to Thomas Edison, who was a famous inventor. When he was working on his first phonograph, he had a lot of problems. He blamed the problems on an imaginary insect that had hidden inside the machine. He was quoted in the newspaper as saying there was "a bug" in his phonograph. This was in 1889, and it is the first recorded use of the word *bug* in such a context.

### Exercise 16, p. 223.

#### *Early Mirrors*

Mirrors are not a modern invention; they have been used since the stone age. The first mirrors were made from rocks. A special type of stone was needed: obsidian. This is a volcanic glass that is found in lava. To make the mirror, the stone was ground down on one side with another stone until the surface was flat. Then it was polished repeatedly until it became extremely shiny. At that point, the surface was highly reflective, and people were able to see themselves.

### Exercise 26, p. 229.

#### *The 2004 Indian Ocean Tsunami*

In 2004, several countries that border the Indian Ocean, including Indonesia, Thailand, India, Malaysia, and Somalia were hit by an earthquake and subsequent tsunami. (As you may already know, a tsunami is a giant ocean wave.) In just a few short hours, millions of lives were changed forever. The earthquake was measured at 9.3 on the Richter scale. It was the fourth largest earthquake since 1900 and the second largest that has ever been recorded on the Richter scale.

The quake was followed by four giant waves as high as 100 feet (or 30 meters). Whole villages were destroyed. Thousands of people were swept out to sea, and many others died due to lack of medical care. In total, almost 300,000 people were killed, and 1.3 million people were left homeless. Aftershocks from the earthquake continued for several days.

Tragically, the damage could have been lessened if there had been a tsunami early-warning system. Such a system already existed for the Pacific Ocean, but it didn't reach to the Indian Ocean. Since the tsunami disaster, governments have worked together to develop an early-warning system so that Southeast Asia will not experience such destruction again from a tsunami.

One was to showcase the physical qualities and athletic performances of its young men. At that time, only Greek males were allowed to compete. In fact, women were not even permitted to watch the games, and the only spectators were men. The other goal was to encourage good relationships among Greek cities. People of other nationalities were not invited to participate.

The winner of each event was crowned with a wreath made of olive leaves. Additionally, his statue could be placed in Olympia for all to see. Winning athletes were treated as heroes when they returned to their cities because with their victory, they brought fame and honor to their hometowns.

#### *An Issue in Health Care: Illiteracy*

According to some estimates, well over half of the people in the world are functionally illiterate. This means that they are unable to perform everyday tasks because they can't read, understand, and respond appropriately to information. One of the problems this creates in health care is that millions of people are not able to read directions on medicine bottles or packages. Imagine being a parent with a sick child and being unable to read the directions on a medicine bottle. We all know that it is important for medical directions to be understood clearly. One solution is pictures. Many medical professionals are working today to solve this problem by using pictures to convey health-care information.

### Exercise 21, p. 367.

#### *Bats*

What do people in your country think of bats? Are they mean and scary creatures, or are they symbols of both happiness and luck?

In Western countries, many people have an unreasoned fear of bats. According to scientist Dr. Sharon Horowitz, bats are not only harmless but also beneficial mammals. "When I was a child, I believed that a bat would attack me and tangle itself in my hair. Now I know better," said Dr. Horowitz.

Contrary to popular Western myths, bats do not attack humans. Although a few bats may have diseases, they are not major carriers of rabies or other frightening diseases. Bats help natural plant life by pollinating plants, spreading seeds, and eating insects. If you get rid

of bats that eat overripe fruit, then fruit flies can flourish and destroy the fruit industry.

According to Dr. Horowitz, bats are both gentle and trainable pets. Not many people, however, own or train bats, and bats themselves prefer to avoid people.

3. A: I'm so relieved that I found my wedding ring. It'd been missing for a month. The next time I take it off, I'm going to put it in a box on top of my dresser.

### Exercise 39, p. 422.

#### *Why We Yawn*

Have you ever noticed that when a person near you yawns, you may start yawning too? This is called contagious yawning. *Contagious* in this sense means that the behavior spreads: in the case of yawning, when one person yawns, it can cause others to do the same thing.

There are various theories about why people yawn. One popular idea is that yawning brings more oxygen into the brain so that people will wake up. Is that what you have thought?

However, in 2007, researchers at a university in New York came up with a new idea: yawning helps cool the brain. When people's brains are warm, they yawn more frequently; yawning brings cooler air into the body and, therefore, cools the brain. This is important because cooler brains work better than warmer ones.

This may also help explain why yawning is contagious. People are more awake when their brains are cooler; therefore, contagious yawning helps people be more alert. As people evolved, this was important in times of danger. If they yawned, they could have been signaling to others to stay awake.

While it can be annoying to have a person yawn when you are talking, perhaps you can tell yourself that he or she actually wants to stay awake, not go to sleep.
